Director Infrastructure Projects  
Planning Services  
NSW Department of Planning and Environment  
Application Number SSI 14\_6788  
GPO Box 39  
Sydney NSW 2001

Dear Director,

I object to the 'WestConnex New M5' (SSI 6788) for the reasons outlined below.

The WestConnex will not solve Sydney's traffic issues; the Environmental Impact Statement itself demonstrates, that even with construction of the full project, travel times in our community will only improve by as little as 30 seconds whilst, in other areas, traffic on suburban streets will increase by almost as much as 50%.

Spending \$17bn of taxpayer money on an infrastructure project that is not part of an integrated transit policy is just plain irresponsible.

The EIS demonstrates that the number of vehicles that will access the WestConnex road network is significantly lower than expected due to excessive tolling. This will mean more cars on suburban streets trying to find short cuts. Streets in our community are already in effect standing carparks; they just can't take additional traffic.

The impact of the WestConnex is such that it isn't just cars and private traffic which will experience ongoing gridlock, the EIS also shows that this project will severely hamper bus services, increasing travel time by over 20% in some instances. For those people who lessen the overall traffic burden by utilising public transport, this project is a punishing concern.

The WestConnex will result in the clearing of countless homes, and will severely affect parts of the community, destroying the amenity of residents in places like Euston Road.

The placement of unfiltered smoke stacks in our community will pour dangerous pollutants into residential areas and near to schools like Alexandria Park Community School.

The EIS also does not take into account the impact of flow on traffic to areas in our community which fall outside the reports very limited area of study. Therefore this EIS has not considered the flow on impact of traffic emerging from the St Peters interchange into the suburbs of Mascot, Eastlakes, Kensington, Kingsford, Erskineville and Alexandria, not to mention other areas, such as to the inner city or to the east.

I would also like the following issues in the EIS addressed:

- The negative impact this project has on public transport.
- The unfiltered smoke stacks putting our health at risk.
- The widening of Campbell Street and Euston Road.
- The acquisition and clearance of homes and businesses in our community.
- The impact of rat run traffic on our community roads caused by thousands of extra cars exiting the St Peters Interchange.
- The lack of adequate traffic modelling
