Attn: Petula Bowden

Re: DA No. 05.0038 – Carters Creek

The current owner has recently purchased the property and has commissioned our firm to commence survey and design for the engineering and construction certificate of the proposed development.

We note that the existing consent is due to lapse on the 5th April 2014 and the owner wishes to confirm that the development as approved will not lapse as he has expended considerable money to date.

The 'physical commencement' to date relates to the initial engineering surveys that are required to enable the preparation of the construction certificate for road and drainage designs.

To date our surveyors have physically carried out the pegging of the centreline of the main road, levelling and detailing of the road corridor and intersection and established survey control by GPS for the set-out of the works.

We attach a copy of the field data captured and the plan showing the geometry as surveyed. A photo of the road centreline pegs are attached for your records.

Could you please acknowledge that the development has commenced and therefore will not lapse.

Yours faithfully
