Proposed Extension to Open Cut Mine and Rehabilitation Activities. Project Description February 2006

Location :

25 km Northwest of Lithgow
2.5 km Southeast of Cullen Bullen
5 km Northeast of Portland

Land to be Developed:

Proposed Open Cut workings located within Mining Lease (ML) 68. Other activities associated with Part of Mining Purposes Lease (MPL) 80, Part of MPL 1346, Part of Consolidated Coal Lease 702 (CCL702), freehold land owned by Coalpac Pty Limited being Lot 1 of FP 180294 and Lot 113 of DP 877190.

Proponent: Coalpac Pty Limited

Planning Information Meeting: 25th May 2005

Project Reference Number: 06_0065

Community Consultation: The proponent has consulted directly with the nearest residents, the adjoining landholder, with representation of the Cullen Bullen Progress Association, Lithgow City Council, Department of Planning and with other interested parties and Regulatory Authorities.

Project Description: It is proposed to remove between 110 000 to 350 000 tpa of coal, by open cut mining methods, from the Irondale, Lidsdale and Lithgow Seams from the area adjoining the previous open cut highwall to the limit of the existing surface lease (ML 68).

Coal will be crushed on site at a mobile crushing plant for distribution, by road transport, to local power stations and domestic markets.

Coal removed will satisfy coal contracts with Delta Western and Domestic customers through to 2008.

Rehabilitation of mined areas will facilitate final landforms consistent with the surrounding Ben Bullen State Forest.
