RE: Orora Paper Mill – 1891 Botany Road, Matraville – MP 05_0120 MOD 9

Dear Ms Dorocinska,

Thank you for notifying Sydney Water of the applicant's response to the request for information for the modification at Orora Paper Mill. We note their responses in explaining that the increase in production limit from 425,000 to 500,000 will cause no changes to the current water system.

However, Sydney Water's position remains the same in our requirements for the applicant to apply for a Section 73 certificate as well as provide detailed water and wastewater hydraulic figures. Section 78 of the *Sydney Water Act* requires consent authorities to notify Sydney Water of Development Applications that can affect the delivery of its services. This notification is managed by the consent authorities inserting a condition in the development consent that the developer applicant obtains a Section 73 Compliance Certificate from Sydney Water.

Please see Attached 'Types of development that need a Section 73 certificate' as a condition of development consent. Point 10 of that attachment reads: "Industrial, commercial and special use development, where there is a change in use of existing buildings and facilities that may result in increased demand for water and/or the discharge of trade waste water from the premises". Specifically 'plywood and paper product manufacturing' is listed as an industrial development which requires this certificate.

If you require any further information, please contact the Growth Planning Team on 8849 6073 or email urbangrowth@sydneywater.com.au.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Cassie Loughlin".

Cassie Loughlin,
Manager, Growth Planning

Types of development that need a section 73 certificate

Introduction

Section 78 of the *Sydney Water Act* requires consent authorities to notify Sydney Water of Development Applications that can affect the delivery of its services. This notification is managed by the consent authorities inserting a condition in the development consent that the developer applicant obtains a Section 73 Compliance Certificate (certificate) from Sydney Water.

(A claim might be made against a consent authority if they fail to make this notification.)

The developer makes an application for that certificate to Sydney Water through an authorised Water Servicing Coordinator. Sydney Water tells them of any requirements that must be met before the certificate can issue.

Sydney Water issues updates of these guidelines to consent authorities to help them decide which types of development should be referred. The latest update was sent on 15 May 2012.

That update included lists of the types of development that do and do not need to be referred. It also included reminders that consent authorities no longer need to:

- see our Notice of Requirements before they release the Construction Certificate
- refer 'secondary dwellings' approved under the Affordable Housing State Environmental Planning Policy (AHSEPP) for our Section 73 Compliance Certificate.

Towns were added to Table C.

To see copies of those lists, go to Attachments 1 and 2 over the page.

To find out more about these guidelines, call Sydney Water on 13 20 92.

NOTE – Building plan approval:

Attachments 1 and 2 do **not** cover the types of development that need Sydney Water building plan approval. To find out more, visit the [Building plan approvals](#) page in the Plumbing, building and developing section of our website.

ATTACHMENT 1

Types of development to be referred for a Section 73 Compliance Certificate as a condition of Development Consent are shown below - there are specific exclusions for some of these types and they are shown in Attachment 2:

1. Subdivision by Torrens, Community, Strata and Stratum Title, and subdivision for lease purposes (**includes** Strata Title conversion to Torrens Title; any road closure requiring a Subdivision Certificate; and any boundary adjustment).
2. Dual occupancy development (**including** 'granny flat' development that **cannot** be approved under the State Environmental Planning Policy (Affordable Rental Housing) 2009), whether being subdivided as in 1. above or remaining unsubdivided.
3. Medium density (multi-unit) residential development ie applications for the erection of buildings including dual key apartments (please identify in development description).
4. Development in rural or non-urban zoned land or Residential Bushland Conservation or similar zoning (including single residential development).
5. Development where Council is considering the approval of servicing arrangements that could be independent of Sydney Water's water or sewer systems.

For example: Development serviced by rainwater tanks as a primary water supply and alternate wastewater treatment systems.

6. Vacant single dwelling development on lots created by subdivision **BEFORE** April 1964. This includes referral of development where development consent is required for the erection of structures only.

For example: existing undeveloped lots created prior to the Local Government Act, existing undeveloped lots previously rated with another lot (eg. former tennis courts), or the demolition of a single dwelling and construction of separate single dwellings on existing multiple lots.

This referral is required because some lots in established areas may not have been previously issued with a Compliance Certificate at the subdivision stage and therefore may not have direct access to water or sewer services.

7. Development on previously publicly owned land. For example: railway lands or land resulting from road closures.
8. New development of vacant land for industrial, commercial and special use.

'Special use' includes but is not restricted to schools, preschools, religious centres, sporting facilities, community facilities (Police, Fire Ambulance, SES), community halls, senior citizen centres, youth centres, parks/reserves where there will be water use, government and agency depots/substations, hospitals.

9. Industrial, commercial and special use re-development where new building is involved.
10. Industrial, commercial and special use development, where there is a change in use of existing buildings and facilities that may result in increased demand for water and/or the discharge of trade waste water from the premises. **The types which should be referred are included in tables A & B below.** Other changes of use need not be referred.
11. Crown development, Commonwealth and State. (Note: Generally falls into one of the above categories.)

Table A: INDUSTRIAL

Any change of use where waste water is likely to be generated in addition to domestic sewage (ie in addition to waste water generated by persons for their personal hygiene):

- food, beverage and tobacco manufacturing & wholesaling
- textile and leather manufacturing
- plywood and paper product manufacturing
- printing, published and recorded media
- petroleum and chemical product manufacturing
- ceramic, cement and plaster product manufacturing
- metal product manufacturing
- industrial and transport equipment manufacturing
- motor vehicle retailing

Table B: COMMERCIAL

Butchers	Hospitals	Photographic Processing
Charcoal Chicken Shops	Hot Bread Shops	Pizza Shops
Commercial Car Washes	Hotels	Restaurants
Commercial Laundries	Medical Centres	Schools
Delicatessens	Mechanical Repairers	Service Stations
Dry Cleaners	Motels	Take Away Food Shops
Fresh Chicken Shops	Nursing Homes	Veterinary Surgeons

ATTACHMENT 2

Development types not to be referred for a Section 73 Compliance Certificate are:

1. Strata subdivision plan for a building approved by an earlier DA, ie strata title of an existing block of units where building was completed either:
 - 1.1 **Before** April 1964 (**except** if the consent authority considers a compliance certificate is required under the Strata Schemes (Freehold Development) Act 1973); or
 - 1.2 **From** April 1964 and covered by a Compliance Certificate issued on construction DA (**except** for dual occupancy development that must be referred).
2. Consolidation of existing lots of land not involving subdivision of the existing lots.
3. Vacant single dwelling development on lots created by subdivision **AFTER** April 1964 (ie. Generally where an earlier Sydney Water Compliance Certificate has been issued).
4. **A new single residential dwelling replacing an existing dwelling.**
5. **Alterations, additions to an existing residential dwelling.**
6. 'Secondary Dwelling' development approved under the State Environmental Planning Policy (Affordable Rental Housing) 2009 and Wollondilly LEP 2011. (The Department of Planning & Infrastructure also refer to this development as 'granny flats'.)
7. Carports on residential lots.
8. Non- habitable garages, sheds or outbuildings.
9. Swimming pools.
10. Development in areas identified as being beyond Sydney Water's service limits but within its area of operations - **see Table C on the following page for a list of these areas.** Exceptions are:
 - a) large-scale development where the developer has advised the consent authority that Sydney Water servicing may be sought; or
 - b) if the consent authority requires consultation with Sydney Water; or
 - c) if the consent authority considers a compliance certificate is required under the Strata Schemes (Freehold Development) Act 1973.
