SYDNEY NSW 2001

Attention: Paul Weiner

Dear Paul

PROJECT APPLICATION 05_0174 – ADDITIONAL INFORMATION

We refer to the above and confirm the following information in relation to all land affected by the proposal.

The land to be affected by the proposal is described in Real Property Terms as:

- Oyster lease # 80-178;
- Bed of Wallis Lake and Wallamba River;
- Lots 59, 101, 123, 124, 125 DP 753207;
- Lot 12 DP 816473; and
- Lot 196 DP 1102427.

All lots are in the same ownership. Landowners' consent was provided with the Preliminary Assessment application forms.

Attached is a map detailing the area to be utilised by the stockpile site operations, including notation of areas to be used for sand stockpiling and haulage from the site, as well as the locations of Ponds 1 and 2. Note that Pond 1 will be progressively used as a stockpile site for the second half of the dredge operations.

Individual sand stockpiles are not shown, as their exact location would be determined at the time of operations, according to the quantities being received and exported from the site. An adaptive approach to the management of the stockpile site operations is required to allow flexibility to the operations to cope with variations in supply and demand of sand.

The area identified for the stockpile site operations was subject to the assessment provided in the EA, which slightly overestimated the area as 6 ha. Following a review of the area that would be practically required for the stockpile site operations, the area to be utilised for the stockpile operations is estimated to be approximately 4.539 ha, which includes the area occupied by both ponds.

Should you require any further information, please do not hesitate to contact the undersigned.

Yours faithfully

Orogen Pty Ltd
