**(Name withheld), of Hazelbrook NSW, made the following submission on the project:**

## **Mangoola Mine - Modification 6 - Extraction Rate Increase**

---

### **Objects to this project**

They want to increase extraction by 30% and dump toxic salt water in the Hunter River. This mine is in a fragile ecological area already under pressure from this and other mines. The Hunter River is at a high risk of being irreparably polluted which would be devastating to local wildlife and farming. The local community is already under high health stress from dust levels. We are at a crucial time in our history when scientists are saying we must keep fossil fuels in the ground and this mine wants to rip out as much as they can as quick as they can with no heed to the environment or the local community!
