(Name withheld), of Epping VIC, made the following submission on the project:

[Mangoola Mine - Modification 6 - Extraction Rate Increase](#)

Objects to this project

After scientists have informed us that we should not be taking any more fossil fuels from the earth I am perplexed at Mangoola Mine wanting to enlarge their mine in the Hunter Valley. They have a conscious obligation to people and the environment to stop this procedure. The use of salt and other chemical runoff will cause massive destruction to the Hunter River, farming land and nature reserves around it and in turn the fragile existence of fauna and flora of the area will be hugely impacted upon. The dust from this mine is already causing ill health within the local community and any further development will not only exacerbate health problems but will also subject people and the environs to a lower standard of living. Before they undergo such expansion they should take heed and consider the destruction it will have on people and the environs for centuries to come. This is not the way we should be going forward. I oppose any further enlargement of the Mangoola Mine.
