SUBJECT: Angus Place Coal Project (06_0021 Modification 1)

The NSW Office of Water (NOW) has reviewed the environmental assessment for the Angus Place Coal Project (06_0021 Modification 1).

NOW recommends that the Water Management Plan is to be updated based upon the recommendations of the surface water assessment for the additional monitoring sites downstream of LDP001 in Kangaroo Creek and in Coxs River upstream of the Kangaroo Creek confluence and to increase the sampling frequency of monthly samples for all analytes for the extended 2 year period to develop site specific trigger levels.

NOW also recommends that the amended Water management plan is submitted to NOW for review within 6 months of approval.

If you require further information please contact Jodie Dabovic on 4904 2571.

Yours sincerely

Mark Mignanelli
Manager Major Projects and Assessment
