Ms Natalie Nolan
Glendinning Minto & Associates
PO Box 225
Thornleigh NSW 2120

Dear Ms Nolan

Director General's Requirements Waste Oil Transfer Station, St Marys

The Department has received your application for the proposed construction and operation of a waste oil transfer station at St Marys (Application Number: 06_0022).

I have attached a copy of the Director-General's requirements (DGRs) for the project. These requirements have been prepared in consultation with relevant government authorities and are based on the information that you have provided to date. I have also attached a copy of the government authorities comments for your information.

Please note that under section 75F(3) of the *Environmental Planning and Assessment Act 1979*, the Director-General may alter these requirements at any time.

I would appreciate it if you would contact the Department at least 2 weeks before you propose to submit the draft Environmental Assessment for the project to determine the:

- fees applicable to the application;
- consultation and public exhibition arrangements that will apply; and
- number and format (hard-copy or CD-ROM) of the Environmental Assessment that will be required.

As you may know, the Department will review the draft Environmental Assessment in consultation with the relevant authorities to determine if it adequately addresses the Director-General's requirements. If the Director-General considers the Environmental Assessment to be inadequate, you will be required to revise it prior to public exhibition.

The Director-General's requirements will be placed on the Department's website along with other relevant information which becomes available during the assessment of the project. As a result, the Department would appreciate it if all documents that are subsequently submitted to the Department are in a suitable format for the web, and if you would arrange for an electronic version of the Environmental Assessment for the project to be hosted on a suitable website with a link to the Department's website.

Finally, if your proposal contains any actions that could have a significant impact on Matters of National Environmental Significance, it will require an additional approval under the Commonwealth *Environment Protection Biodiversity Conservation Act 1999* (EPBC Act). This approval would be in addition to any approvals required under NSW legislation. If you have any questions about the application of the EPBC Act to your proposal, you should contact the Commonwealth Department of Environment and Heritage in Canberra (02 6274 1111 or <http://www.deh.gov.au>).

If you have any enquiries about these requirements, please contact Ann-Maree Carruthers, on 02 9228 6550.

Yours sincerely

A handwritten signature in black ink, appearing to be 'CW', with a long horizontal line extending to the right.

Chris Wilson
A/Executive Director
As delegate of the Director-General

Director-General's Requirements

Section 75F of the *Environmental Planning and Assessment Act 1979*

Project	The construction and operation of a waste oil transfer station.
Site	85 Christie Street, St Marys
Proponent	Klekies Pty Ltd
Date of Issue	25 June 2006
Date of Expiration	25 June 2008
General Requirements	The Environmental Assessment (EA) must include • an executive summary; • a detailed description of the project including the: – need for the project; – alternatives considered, including a detailed justification why the proposed warehouse needs to be located on the site; and – various components and stages of the project; • consideration of any relevant statutory provisions; • an overview of all the environmental impacts of the proposal (including an environmental risk analysis) and identification of the key issues for further assessment, taking into consideration the issues raised during consultation; • a detailed assessment of the key issues specified below and any other significant issues identified in the environmental risk analysis (see above), which includes: – description of the existing environment; – an assessment of the potential impacts of the project, including any cumulative impacts; – a description of the measures that would be implemented to avoid, minimise, mitigate, offset, manage, and/or monitor the impacts of the project; • a draft Statement of Commitments, outlining environmental management, mitigation and monitoring measures; • a conclusion justifying the project, taking into consideration the environmental impacts of the proposal, the suitability of the site, and the general costs and benefits of the proposal; • a signed statement from the author of the EA certifying that the information contained in the report is neither false nor misleading.
Key Issues	• Waste – including: ○ identification of the quantity and nature of waste that would be handled/stored/disposed of at the facility; ○ a description of how this waste would be stored and handled on site, and transported to and from the site; and ○ identification of the potential impacts associated with storing this waste. • Hazards and Risk – including consideration of the proposal against the relevant provisions of <i>State Environmental Planning Policy No.33 – Hazardous and Offensive Development</i>. • Water and Soils – including the proposed erosion and sediment controls (during construction), the proposed stormwater management system (during operations), flood liability of the site and the potential for spillage of contaminants on the site. • Traffic – including details of the traffic volumes likely to be generated during construction and operation, and an assessment of the predicted impacts of this traffic on the safety and capacity of the surrounding road network;

	• Noise; and • Air quality.
References	The Environmental Assessment must take into account relevant State government technical and policy guidelines. While not exhaustive, guidelines which may be relevant to the project are included in the attached list.
Consultation	During the preparation of the Environmental Assessment, you must consult with the relevant local, State or Commonwealth government authorities, service providers, community groups or affected landowners. In particular you must consult with; • Department of Environment and Conservation; • NSW Fire Brigade; and • Penrith City Council. The consultation process and the issues raised should be described in the EA
Deemed Refusal Period	60 days
