Peter Fryar
Moody and Doyle Pty Ltd
First Floor, Suite 102,
25-39 Berry St
North Sydney NSW 2060

Dear Mr Fryar

Director General's Requirements
Chester Hill Materials Recycling Facility (06_0053 MOD 1)

I refer to your request to modify the Minister's approval for the Chester Hill Materials Recycling Facility under Section 75W of the *Environmental Planning & Assessment Act 1979* (EP&A Act).

I have attached a copy of the Director-General's requirements for the environmental assessment of the proposed modification.

I would appreciate it if you would contact the Department at least 2 weeks before you propose to submit the environmental assessment for the proposal. This will allow the Department to determine:

- the fees applicable;
- the consultation requirements; and
- the number of copies of the environmental assessment required.

If you have any enquiries about these requirements, please contact Megan Webb of the Department's Manufacturing and Rural Industries team on 02 9228 6495 or megan.webb@planning.nsw.gov.au.

Yours sincerely

20.11.08

Chris Wilson
Executive Director
Major Project Assessment
As delegate for the Director-General

Director-General's Requirements

Section 75W of the *Environmental Planning and Assessment Act 1979*

Modification	To change the layout of the facility to allow the recycling of additional types of material.
Site	Lot 8, DP 1039882, 191 Miller Road, Chester Hill
Proponent	No. 1 Demolition and Excavation Limited
Date of Issue	19 November 2008
General Requirements	The Environmental Assessment (EA) must include: • an executive summary; • a detailed description of the proposal including the: ▪ need for the proposal; ▪ alternatives considered; and ▪ plans for any new buildings; • consideration of the proposal against any relevant statutory provisions, including whether it is consistent with the objects of the <i>Environmental Planning & Assessment Act 1979</i>; • a general overview of the environmental impacts of the proposal, identifying the key issues for further assessment; • a detailed assessment of the key issues specified below, and any other significant issues identified in the general overview of environmental impacts of the modification (see above), which includes: ▪ a description of the existing environment; ▪ an assessment of the potential impacts of the proposal; ▪ a description of the measures that would be implemented to avoid, minimise, mitigate, offset, manage and/or monitor the impacts of the proposal; • a Statement of Commitments, outlining the proposed environmental management, mitigation and monitoring measures; and • a signed statement from the author of the EA certifying that the information contained in the report is neither false nor misleading.
Key Issues	• Waste - including waste classification, receipt and stockpiling, and methods and monitoring to maximise resource recovery; • Development Controls - demonstrate that the proposal is generally consistent with the <i>Bankstown Development Control Plan 2005 (DCP)</i>, and justify any inconsistencies between the project and the DCP; • Noise - including construction, operation and traffic; • Soil and Water - including the proposed erosion and sediment controls (during construction), the stormwater management system (during operations), flooding, potential offsite drainage impacts, and water supply and efficiency measures - including rainwater harvesting; • Air Quality - including dust; • Traffic - including parking requirements, traffic movements likely to be generated during construction and operation, and an assessment of the predicted impacts of this traffic on the safety and efficiency of the surrounding road network; and • Visual Impacts - including the design and articulation of any buildings (scale, height and bulk), landscaping, lighting, any signage, impacts on the views and amenity of the area and measures to mitigate these impacts.
References	The Environmental Assessment should take into account the relevant State Government technical and policy guidelines. While not exhaustive, the attached list identifies some of the potentially relevant guidelines.
