

Contents Volume 1

EXECUTIVE SUMMARY	25
1.0 INTRODUCTION	69
1.1 Background	69
1.2 Overview of the Proposal	70
1.3 Objectives of the Environmental Assessment	71
1.4 Key Planning Requirements	74
1.4.1 Director General's Requirements	74
1.4.2 Requirements from Other Authorities	79
1.5 Project Team	80
1.6 Location of the proposed Kyoto Energy Park	80
1.6.1 Middlebrook Station	81
1.6.2 Mountain Station	81
1.7 Land Tenure and legal description	83
2.0 PROJECT DESCRIPTION	89
2.1 Introduction	89
2.1.1 What is the Project Application seeking approval for?	89
2.1.2 Capacity of the Kyoto Energy Park	92
2.2 Generator Components	92
2.2.1 Wind Turbine Generators	92
2.2.2 Selection of Wind Turbine	95
2.2.3 Wind turbine operation	95
2.2.4 Environmental considerations of turbine selection	96
2.2.5 Wind Monitoring	97
2.2.6 Wind Turbine Layouts	98
2.2.7 Wind turbine Micro-siting	99
2.3 Mt Moobi Solar PV Farm	99
2.3.1 Preliminary solar plant investigation	99
2.3.2 Solar Photovoltaic Technology and Application	104
2.3.3 Viability of Commercial Solar PV Plants	105
2.3.4 Solar PV Site suitability and location	105
2.3.5 Solar PV Options	106
2.3.6 Solar PV Design and Electrical Infrastructure	107
2.3.7 Solar Modules	107
2.3.8 Supporting Structure Options	108
2.3.9 Other components of the Solar PV plant	110
2.4 Mini Hydro Plant (Closed-loop)	112
2.4.1 Introduction	112
2.4.2 Proposed 1MW Mini-hydro Plant (Closed Loop)	113
2.4.3 Site suitability	115
2.4.4 Noise Issues	115
2.4.5 Heritage Issues	116
2.4.6 Flora and Fauna Issues	116
2.4.7 Visual considerations	117
2.4.8 Mini-hydro Plant (Closed loop) Design layout	117
2.5 Internal Electrical Transmission Infrastructure	119
2.5.1 Site Substation	119
2.5.2 Internal power cables	120
2.5.3 Internal Access tracks	122
2.5.4 Manager's Residence	122
2.5.5 Visitor's and Education Centre	124
2.5.6 Maintenance Shed	127
2.5.7 Site Utility Services	129
3.0 PROJECT DEVELOPMENT PHASES	133
3.1 Construction	133
3.1.1 Stages of Construction	133
3.1.2 Site Offices and Depot	133

3.1.3	Concrete Batching Plant	134
3.1.4	Internal Access Tracks	136
3.1.5	Crane Hard Stand Areas	136
3.1.6	Turbine Foundations	138
3.1.7	Substation Switchyard and Control Building	140
3.1.8	Turbine Transportation and Assembly	140
3.1.9	Construction Activities Mt Moobi Solar PV Farm	141
3.1.10	Construction Activities Mini-hydro Plant	142
3.1.11	Internal Power Cables	142
3.1.12	Construction Equipment	142
3.1.13	Hours of Operation	143
3.1.14	Site Restoration	143
3.1.15	Traffic Generation during Construction	143
3.1.16	Traffic Generation during Operations	145
3.1.17	Grid Connection Agreement	146
3.2	Operation	147
3.2.1	Operational Agreement	147
3.2.2	Detailed Design and Contract Management	147
3.3	Decommissioning	147
3.3.1	Wind Farm Component	147
3.3.2	Mt Moobi Solar PV Farm	148
3.3.3	Mini- Closed-loop hydro plant	148
3.3.4	Building Structures	148
3.4	Development Timeframe	148
3.5	Construction Timeframe.....	150
4.0	STATUTORY PLANNING AND CONSULTATION	155
4.1	Introduction	155
4.2	Commonwealth Legislation	157
4.2.1	Environment Protection and Biodiversity Conservation Act 1999	157
4.2.2	Radio Communications Act 1992	157
4.2.3	Civil Aviation Safety Regulations 1998	158
4.3	State Legislation	158
4.3.1	Environmental Planning and Assessment Act 1979	158
4.3.2	Environmental Planning and Assessment Regulations 2000	159
4.3.3	Protection of the Environment Operations Act 1997	160
4.3.4	Roads Act 1993	160
4.3.5	State Environmental Planning Policy (SEPP) (Major Projects) 2005	160
4.3.6	SEPP 44 Koala Habitat Protection	160
4.3.7	SEPP (Infrastructure) 2007	161
4.3.8	Integrated Development	161
4.4	Local Legislation.....	161
4.4.1	Upper Hunter Local Environmental Plan 1986	161
4.4.2	Muswellbrook Local Environmental Plan 1985	162
4.4.2	Draft Upper Hunter Land Use Strategy	168
4.5	Relevant Development Guidelines	169
4.6	Government Stakeholders and Consultation	170
4.6.1	Consultation with Authorities	170
4.6.2	Planning Focus Meeting	171
5.0	COMMUNITY PARTICIPATION	177
5.1	Community Participation Strategy	177
5.2	Community Participation Plan	177
5.3	Community Consultation Methodology	177
5.3.1	Media Coverage	177
5.3.2	Public Consultations	178
5.3.3	Consultation with Stakeholders	179
5.3.4	Community Information Day	180
5.4	Issues Raised by the Community	181
5.5	Prioritisation of Issues	182
5.6	Specialist Investigations Undertaken.....	182
5.7	Status of the Consultation Process.....	182

6.0	STRATEGIC JUSTIFICATION	187
6.1	Introduction	187
6.2	Status of the Australian and NSW Renewable Energy Market.....	187
6.3	Demand for electricity in NSW	188
6.3.1	Predicted Growth in Demand for Electricity in NSW	189
6.3.2	Demand for Electricity in Muswellbrook/Scone Area	190
6.4	Mitigation of Greenhouse Gases	191
6.4.1	International Greenhouse framework	191
6.4.2	Mandatory Renewable Energy Target (MRET)	192
6.4.3	Electricity Generation and Greenhouse Gas Emissions	192
6.4.4	Greenhouse Gas Benefits from the Kyoto Energy Park	193
6.4.5	Life Cycle Assessment (LCA)	194
6.4.6	Greenhouse Gas Emissions Displaced by the Kyoto Energy Park	195
6.4.7	Energy Payback period	196
6.4.8	Conclusion	196
6.5	Principles of Ecologically Sustainable Development and Greenhouse Gas Emissions	197
6.6	Socio-Economic Impacts	198
6.6.1	Scone demographics	198
6.6.2	Socio-economic Impacts	199
6.6.3	Multiplier Economic Impacts	199
6.6.4	Regional benefits	200
6.6.5	Local Benefits of the Kyoto Energy Park	201
6.6.6	Social and Economic Impacts Conclusions	204
6.7	Strategic Planning considerations	205
6.7.1	Site History	205
6.7.2	Suitability of the Kyoto Energy Park location	205
6.7.3	Access and Transport	206
6.7.4	Native Title Claimants	207
6.7.5	Surrounding Landuses	207
6.7.6	Impacts on future surrounding landuse	207
6.7.7	Potential Devaluation of Property	210
7.0	EXISTING ENVIRONMENT	215
7.1	Topography, Slope & Aspect	215
7.2	Temperature	215
7.3	Rainfall	216
7.4	Snow	216
7.5	Wind Data	216
7.6	Wind Direction.....	216
7.7	Air Quality.....	217
7.8	Existing Services	217
7.9	Local Context and Tourism.....	218
7.10	Existing landuses	218
7.11	Trigonometric Stations.....	219
8.0	BIODIVERSITY, FLORA & FAUNA	227
8.1	Introduction	227
8.2	Flora	227
8.3	Fauna	228
8.4	EPBC Referral	229
8.5	Bird Impact Assessment	232
8.6	Bat Impact Assessment.....	232
8.7	Key Habitats and Corridors.....	233
8.8	Towarri National Park	234
8.9	Hunter Central Rivers Catchment Action Plan	234
8.10	Regional Conservation Implications	235
8.11	Conclusion	236

8.12	Environmental Management Plan.....	236
8.12.1	EEC Vegetation Offset Strategy.....	236
8.12.2	Bird and Bat Adaptive Management Plan.....	237
9.0	HERITAGE	241
9.1	Indigenous Heritage.....	241
9.2	Cultural Assessment methodology.....	241
9.2.1	Background Research.....	242
9.2.2	Identification of Aboriginal Stakeholders.....	242
9.2.3	Consultation with Aboriginal Stakeholders and Community.....	243
9.2.5	Recommendations from Indigenous Stakeholders.....	244
9.2.6	Conclusions.....	245
9.3	European Heritage	246
9.3.1	Study methodology.....	246
9.3.2	Site History.....	246
9.3.3	Site Heritage Impacts.....	246
9.3.4	Impact on European Heritage from Transmission Lines.....	246
10.0	NOISE IMPACT	251
10.1	Noise Assessment criteria	251
10.2	Neighbouring residencies	251
10.3	Noise emissions.....	254
10.3.1	Wind Turbine Generators.....	254
10.3.2	Ancillary Components.....	254
10.3.3	Construction Noise Levels.....	255
10.3.4	Traffic Noise Levels.....	255
10.3.5	Transmission Line Construction.....	255
10.3.6	Van Den Burg Effect.....	255
10.4	Conclusion	257
11.0	VISUAL ASSESSMENT	261
11.1	Methodology.....	261
11.1.1	Visual Setting of the Kyoto Energy Park.....	261
11.1.2	Viewing Locations.....	262
11.1.3	Visual Character of the project.....	263
11.1.4	Statutory Framework.....	264
11.2	Visual Effect	265
11.3	Zones of Visual Influence (ZVI).....	265
11.4	Visual Sensitivity	267
11.5	Visual Impact.....	267
11.6	Photomontage images.....	268
11.7	Visual Impact Assessment.....	268
11.8	Shadow Flicker.....	272
11.9	Blade Glint.....	275
11.10	Design Strategies, Visual Mitigation Treatments	275
11.10.1	Visual Mitigation Treatments at Site.....	275
11.10.2	Visual Mitigation Treatments at viewing location.....	277
12.0	AVIATION	281
12.1	Introduction	281
12.2	Civil Aviation Authority (CASA).....	281
12.3	Air Services Australia	281
12.4	Department of Defence.....	283
12.5	Commercial Operators	284
12.6	Local Private Airstrips.....	285
12.7	Conclusion	285
13.0	ELECTROMAGNETIC INTERFERENCE (EMI)	291
13.1	Introduction	291

13.2	Radio communications.....	291
13.3	Microwave signals	291
13.4	Television Interference	291
13.5	Mobile telephones.....	294
13.6	Aviation and Defence Communications.....	294
14.0	MINERAL RESOURCE STERILISATION	299
14.1	Coal Resources	299
14.2	Existing Coal mining in the area.....	299
14.4	Gas Resources.....	300
14.5	Mining Exploration Licenses	302
14.6	Gravel and Rock Resources	303
14.7	Conclusion	303
15.0	HYDROLOGY	307
15.1	Surface Water Hydrology	307
15.2	Groundwater Resources	307
15.2.1	Impacts on Groundwater	307
16.0	GEOLOGY AND SOILS	315
16.1	Geology.....	315
16.2	Soils	315
16.2.1	General Soil Qualities and Limitations	316
16.3	Excavation works.....	317
16.4	Erosion and Sedimentation Risks and Mitigation Measures	318
17.0	TRANSPORTATION AND TRAFFIC	327
17.1	Introduction	327
17.2	Transport of Oversize and Over Mass Components.....	327
17.3	Roads and Traffic Authority Requirements	328
17.4	Port Options	328
17.5	Transportation scheduling.....	329
17.6	Transportation Routes.....	329
17.7	Preferred Route Port Newcastle to Kyoto Energy Park Route	330
17.8	Site Access	330
17.9	Traffic Generation	331
18.0	BUSHFIRE RISK	337
18.1	Introduction	337
18.2	Manager's Residence	337
18.3	Visitor's and Education Centre.....	337
18.4	Potential Ignition Sources.....	338
18.4.1	Construction Risk Management	338
18.4.2	Operations Risk Management	339
18.5	Bushfire Risk Mitigation	341
19.0	TRANSMISSION LINE CONNECTION TO THE GRID	345
19.1	Existing Distribution Networks	345
19.1.1	Transgrid	345
19.1.2	Energy Australia	346
19.2	Connection of the Kyoto Energy Park to the local Grid	347
19.2.1	Connection Options	347
19.2.3	Transmission constraints	347
19.2.4	Description of Preferred Transmission Line Routes	348
19.3	Community Consultation	355
19.4	Environmental Assessment of Proposed Transmission Line routes.....	355
19.4.1	Flora and Fauna Impact	355

19.4.2	Aboriginal Cultural Assessment	356
19.4.3	European Heritage Impact	356
19.4.4	Soil Management	358
19.4.5	Fire Risk	359
19.4.6	Visual Impact	359
19.4.7	Noise Compliance	360
19.4.8	Electro Magnetic Fields (EMF)	360
19.4.9	Landuse Impacts	362
19.5	Government Consultation	365
19.6	Consultation with Energy Australia/Transgrid/NEMMCO	365
19.7	Final Transmission Design Considerations	365
19.7.1	Private Easements	365
19.7.2	Transmission Line Standards and Design	366
19.7.3	Line Construction Environmental Management Plan	367
19.8	Preferred Connection Option	367
19.9	Conclusion	369
20.0	SAFETY AND ENVIRONMENTAL RISK	373
20.1	Health and Safety Risks	373
20.1.1	Construction Safety	373
20.1.2	Operations Safety	374
20.2	Environmental Risk Analysis	375
20.3	Quantitative Risk Assessment Matrix	375
20.4	Mitigation Measures to reduce Environmental Risk	382
20.5	Residual Environmental Risks	382
20.6	Ongoing Environmental Risk Management	382
20.6.1	Environmental Management Plans (EMPs)	382
20.6.2	EMP Objectives	383
20.6.3	Draft Statement of Commitments	383
21.0	SUMMARY & JUSTIFICATION	405
21.1	Key Strategic Planning Issues	405
21.2	Statutory Planning	405
21.3	Site Suitability & Implications of Proposed Land Uses	406
21.4	Community Feedback	407
21.5	Ecologically Sustainable Development & Climate Change	407
21.6	Consideration of Alternatives	408
21.6.1	The 'Do Nothing' Alternative	408
21.6.2	Alternative Land Use Configurations	409
21.6.3	Consequences of not Proceeding	409
21.7	Principles of Ecologically Sustainable Development and Greenhouse Gas Emissions	410
21.8	Conclusion	412
22.0	TABLES AND FIGURES	420
23.0	GLOSSARY	426
24.0	REFERENCES	430
