

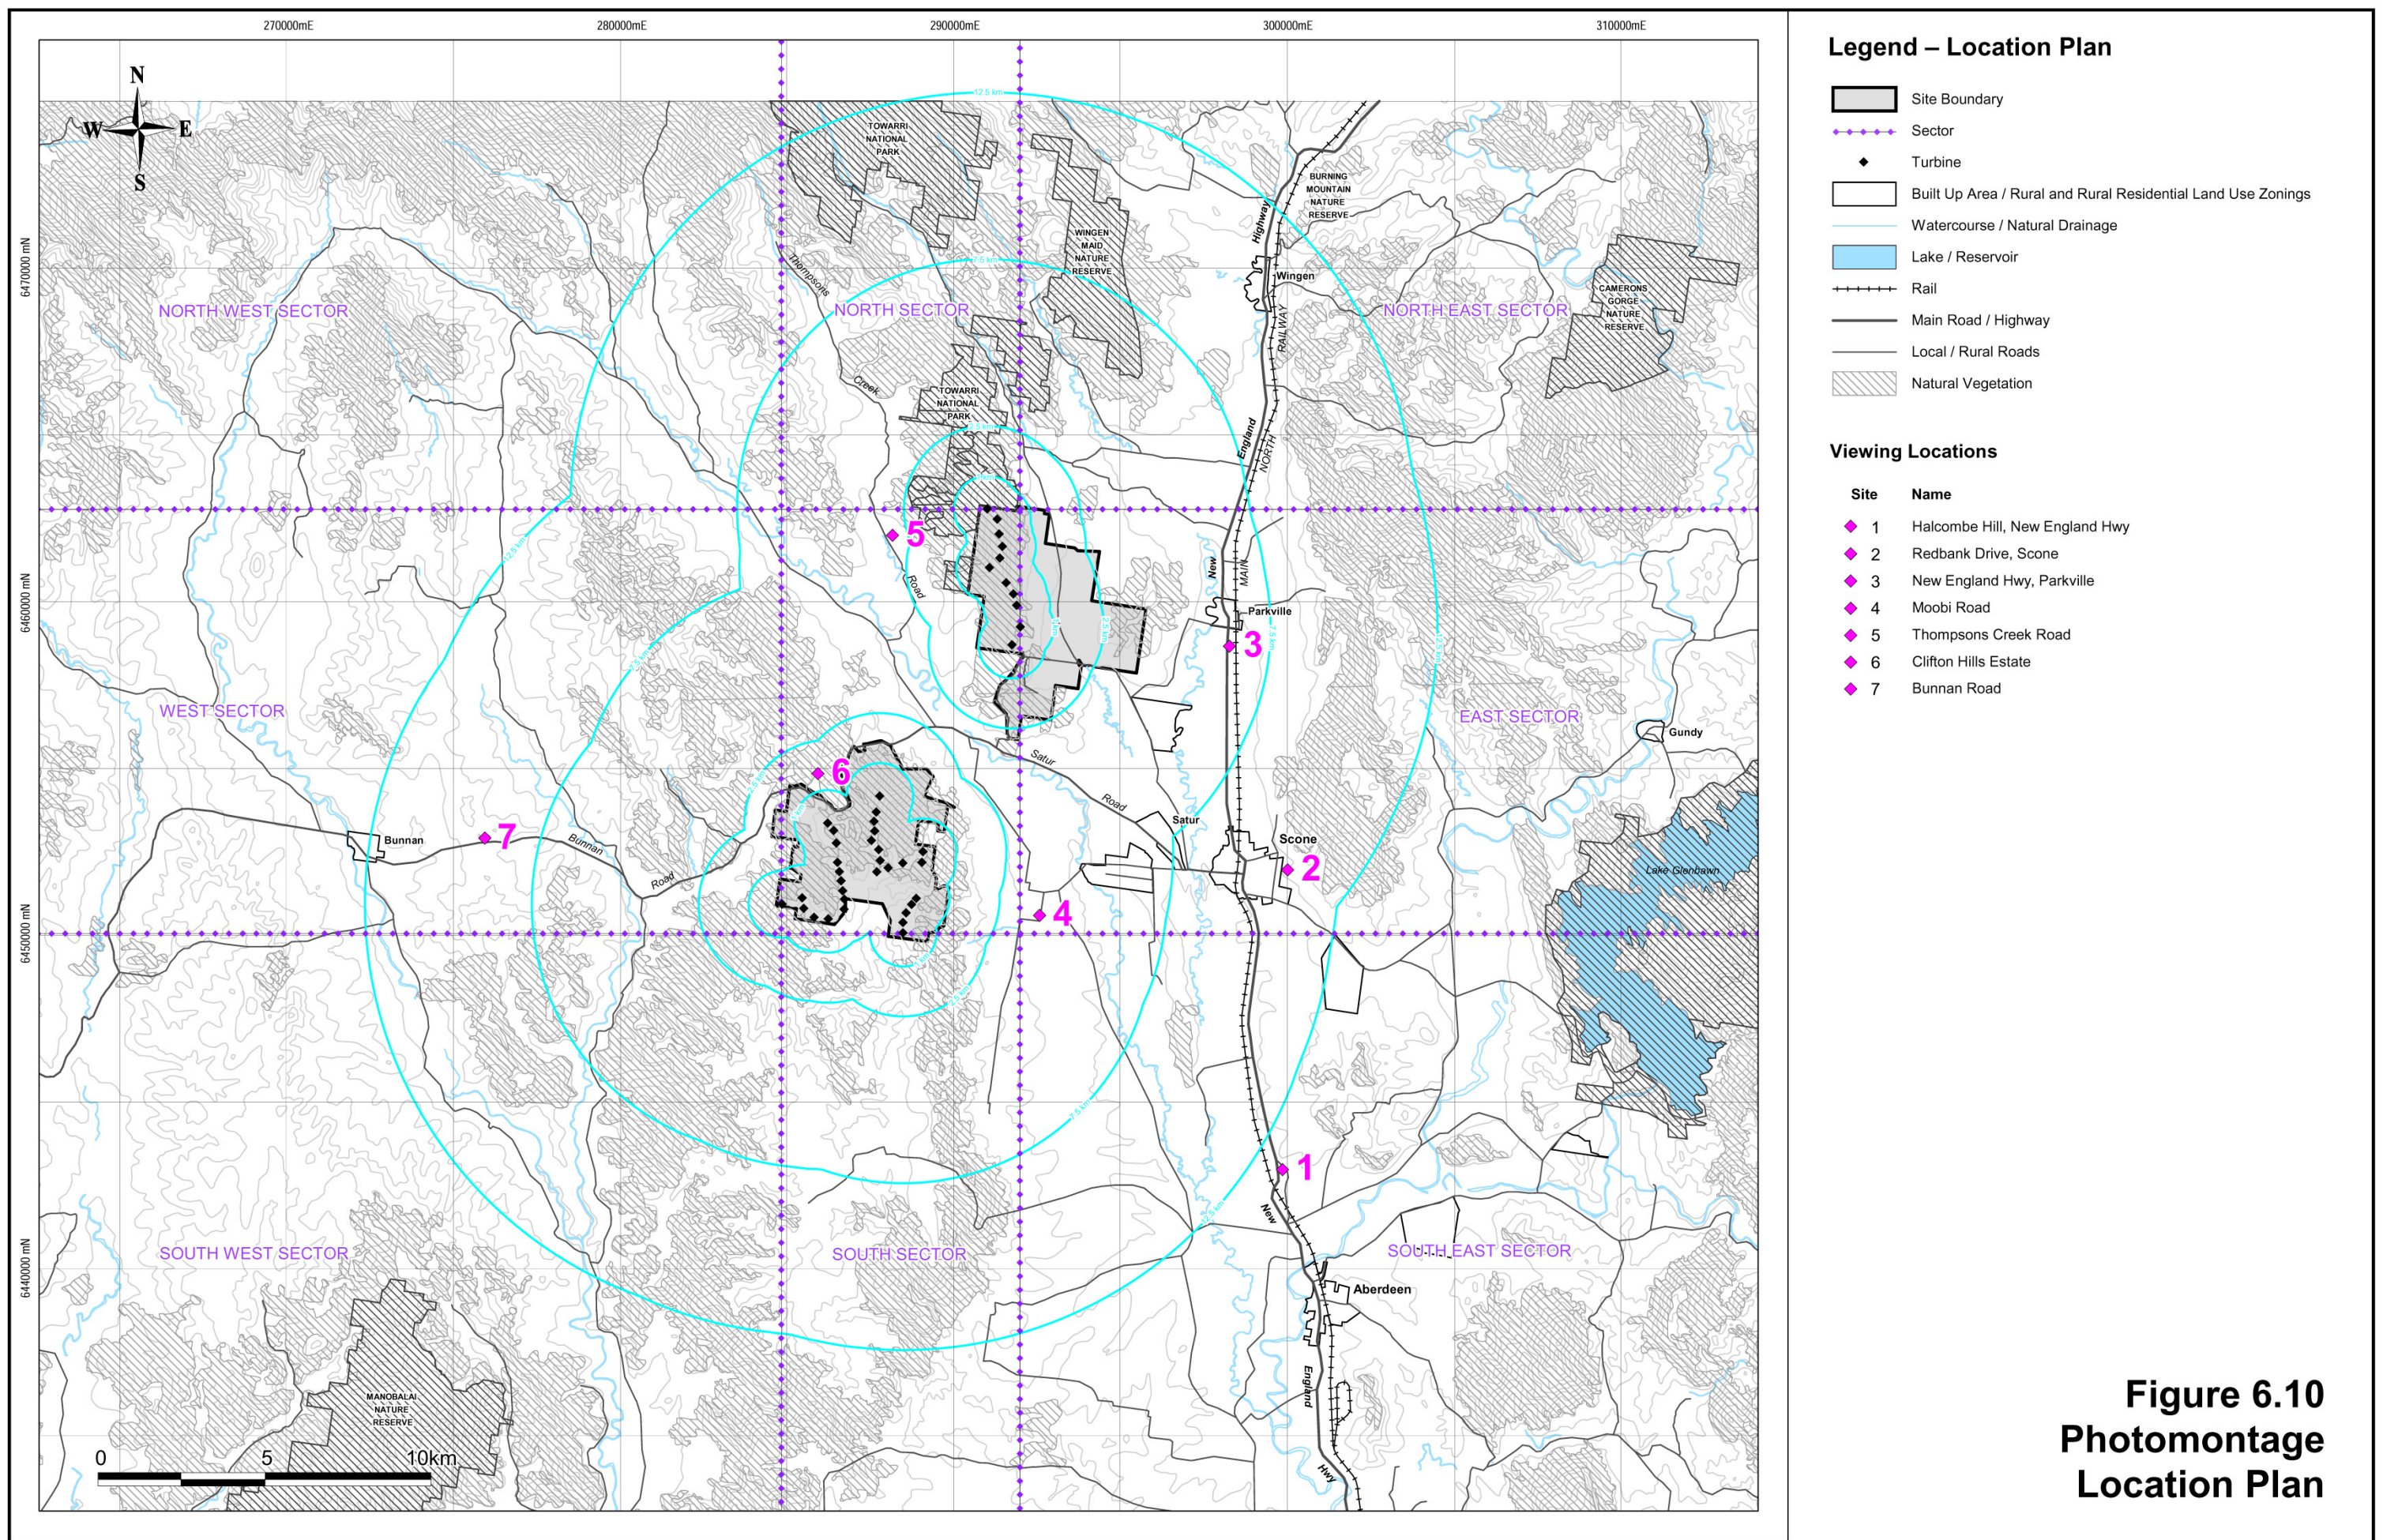

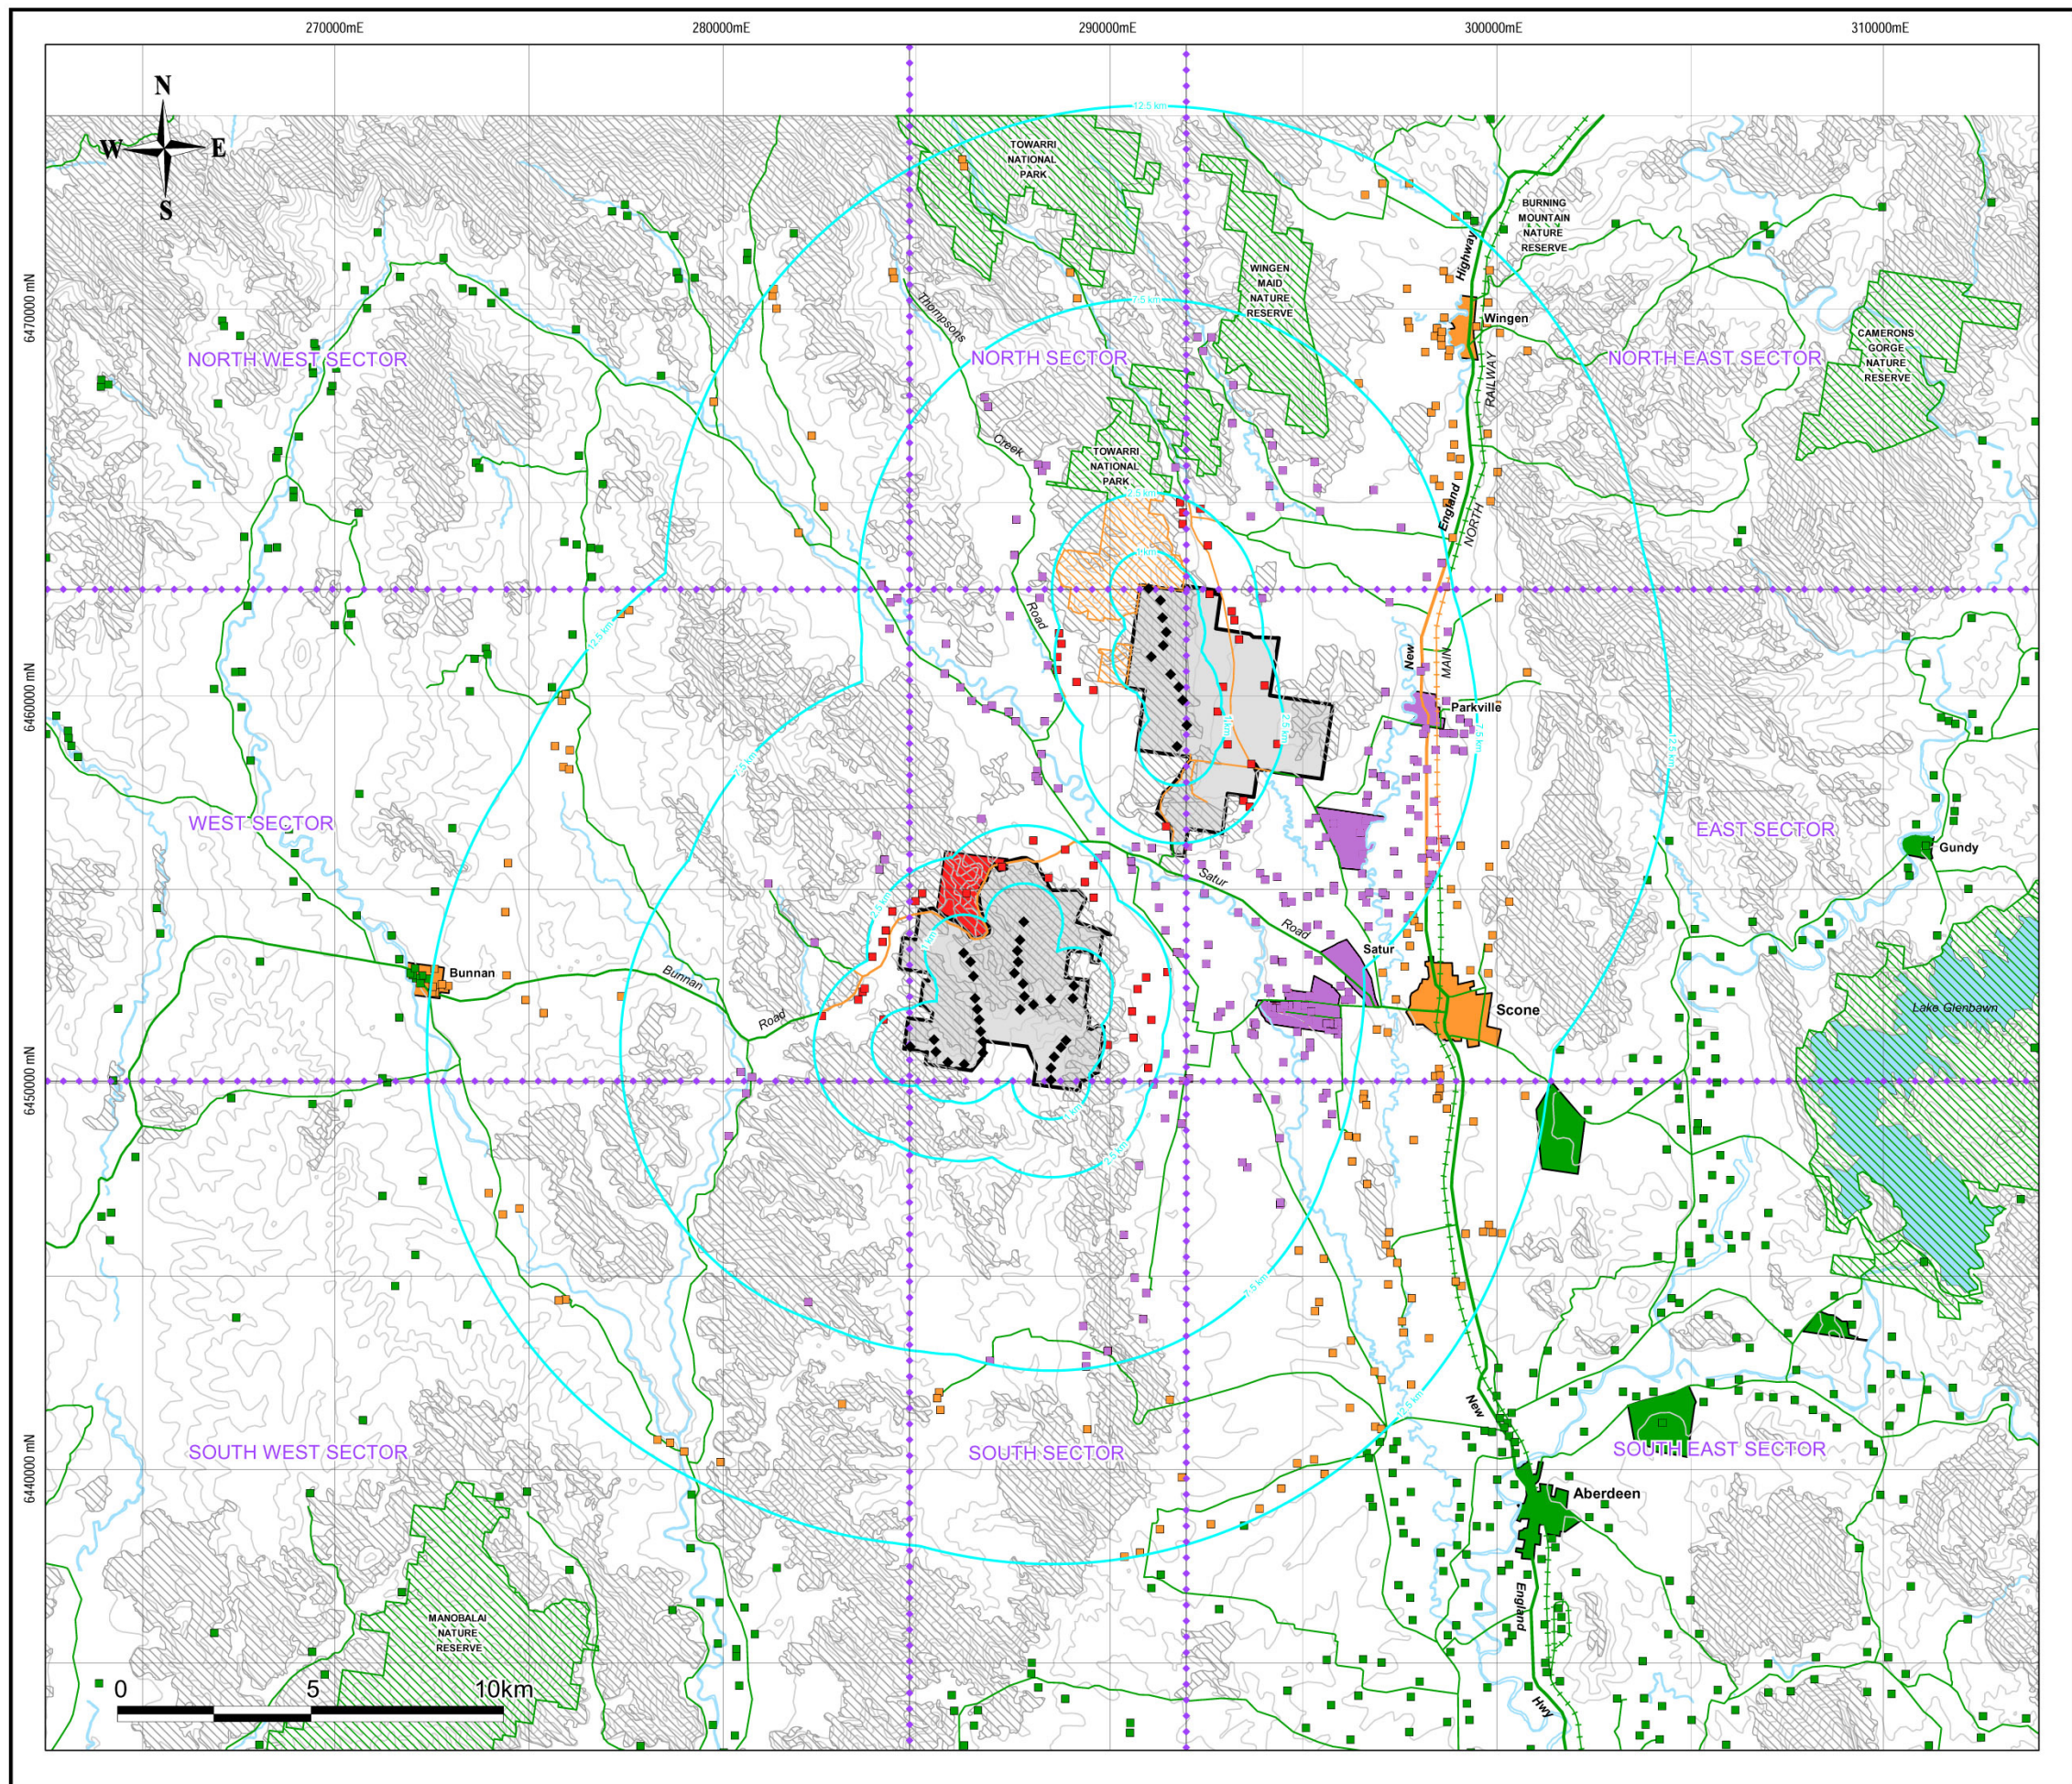

Figure 6.10
Photomontage
Location Plan

NOTE: Areas with potential foreground effects include built up areas and significant stands of vegetation. Additional compilation data sourced from Geoscience Australia has been shown.

Map Datum and Projection Information:
Australian Geodetic Datum 1966
and Australian Map Grid
(Transverse Mercator) Zone 56.

Disclaimer: This Map has been produced for Planning and Development Information Purposes Only. All features shown on this map have not been completely field verified. In some instances the features shown may contain errors, omissions or inaccuracies.

Legend – Visual Sensitivity

- Site Boundary
- Sector
- Turbine
- Built Up Area / Rural and Rural Residential Land Use Zonings
- Building
- Watercourse / Natural Drainage
- Lake / Reservoir
- Rail
- Main Road / Highway
- Local / Rural Roads
- Natural Vegetation

Visual Sensitivity Levels

- Low
- Moderate - Low
- High - Moderate
- High

NOTE (1): Calculation of Visual Sensitivity as per Figure 2.6 takes precedence over values shown on this map.

NOTE (2): In built-up or unvegetated areas, some or all of the wind farm may be screened by buildings and/or vegetation.

NOTE (3): All buildings were assumed to be dwellings. In reality many would be work sheds and have low sensitivity. Buildings shown to be used as a guide only. Additional buildings may exist.
