To whom it may concern

I refer to the Peppertree Quarry approval 06\_0074 in particular, Schedule 2 Condition A10 which states

*"The Proponent may dispatch up to two laden trucks containing quarry products per calendar day. Any additional truck dispatches of quarry products will require the written approval of the Secretary."*

Boral Peppertree Quarry have been asked to support the development of a park land in Marulan in conjunction with the local Council and Chamber of Commerce, with the delivery of 8 loads of overburden. This is to assist in the levelling of the block to allow safety fencing to be installed.

The Quarry have been asked to provide all 8 loads in one day to allow for the cost effective use of a grader to spread the material.

The loads will be restricted to 1 rigid truck resulting in around 80 tonnes of material being delivered to the site.

The truck would travel the length of Marulan south road turning north onto the Hume Highway and before entering Marulan at the roundabout and accessing the land through Meridian park carpark. The loads would be covered.

A record of the movements will be kept and reported as part of the Annual report.

We are more than happy to provide the 8 loads but as it exceeds the limit of 2 as per the condition we require approval of the Secretary.

We have been asked whether we can supply the material this forthcoming Thursday 22<sup>nd</sup> October 2020, when a grader will be available.

Boral Peppertree Quarry therefore requests approval from The Secretary as per Schedule 2 Condition A10, for the delivery by road of 8 truckloads of Overburden to Meriden Park, Marulan over a period of a day commencing the 22<sup>nd</sup> October 2020.

I'm more than happy to discuss or provide additional information.

Regards
