Dear Ms Snape

**Peppertree Quarry (MP 06_0074)
Proposed augmentation of sediment basin**

I refer to your letter dated 18 May 2021 and to your subsequent discussions with the Department regarding this matter.

While the proposed augmentation of the sediment basin described in your letter is considered to be of a very minor nature, these changes are not considered to be 'in accordance' with the Project Layout Plan as required under condition A2(d) of the development consent (as modified). Consequently, the Department considers that a modification application would be required.

The Department considers that section 4.55(1A) of the *Environmental Planning and Assessment Act 1979* would be the appropriate approval pathway for such a modification. The next step will be to submit a scoping request via your dashboard on the Major Projects website. The Department can then provide further guidance on process and assessment requirements.

If you have any further enquiries regarding this matter, please do not hesitate to contact Lauren Evans on 9274 6311.

Yours sincerely

A handwritten signature in black ink, appearing to read 'M Spratt'.
