

Medium Distance Views
Location 1

Photo 1A
View of the site and containment cell from entry road to Cockle Creek railway station, with cell platform at approx. RL 37.15 (as advised), with temporary stockpiles located on the cell platform (8 October 2013)

Photo 1B
Photomontage of the containment cell with height of cell raised by up to 4.15m (from its approved height of RL 38.0 to RL 42.15), with landscape cover over cell and slopes

Location 2

Photo 2A

View of site and containment cell at approx. RL 37.15 (as advised) from Jack Edwards Oval, west of the site (8 October 2013)

Photo 2B

Photomontage of the same view of the containment cell with height of cell raised by up to 4.15m (from its approved height of RL 38.0 to RL 42.15), with landscape cover over cell and slopes

Location 4

Photo 4A
View of site and containment cell at approx. RL 37.15 (as advised.) from Munibung Hill, east of the site (8 October 2013)

Photo 4B
Photomontage of the same view of the containment cell with height of cell raised by up to RL 4.15m (from its approved height of RL 38.0 to RL 42.15), with landscape cover over cell and slopes

Location 5

Photo 5A

View of site and containment cell from north-east at approx. RL 37.15 (as advised) with temporary stockpiles on the cell platform (8 October 2013)

Photo 5B

Photomontage of the same view of the containment cell with height of cell raised by up to 42.15m (from its approved height of RL 38.0 to RL 42.15), with landscape cover over cell and slopes

Location 6

Photo 6A

View of the containment cell (constructed to RL 37.15) from adjacent to the former Laboratory building, with temporary stockpiles on the cell platform (8 October 2013)

Photo 6B

Photomontage of the same view of the containment cell with height of cell raised by up to 4.15m (from its approved height of RL 38.0 to RL 42.15), with landscape cover over cell and slopes
