Director-General

Botany Environment Watch (BEW)
Submission – Orica Car Park Waste Destruction

NSW Planning Director-General
Ground Floor 23-33 Bridge St
Sydney NSW 2000

Members of BEW having read the application to modify CPWE and having sat on the many committee meetings, BEW Member agree it appears Orica has met all the necessary requirements as laid down by all Government Agencies.

However there is no mention of adequate Public Liability Insurance should there be a fatal accident. This should have been a consideration.

As Members of the CPRC which has done everything in its power to ensure all waste storage on Orica site is made known and destroyed with the CPW on site. To be safely destroyed, without damage of health or environment, that workers and residents will be safe which is the promise of Industry and the Government.

Unforeseen accidents can happen, it is only right that suitable Public Liability Insurance is in place should such an incident occur.

Thank you for the opportunity to comment on this proposal and trust that you will assure us that the community will be a major consideration in dealing with welfare concerns.

Yours faithfully

Nancy Hillier
