Dear Mike

### **ARC - Regional Landfill Construction CQA Engineer Addendum to Site Management Plans**

The purpose of this letter is to advise Armidale Regional Council (ARC) on whether the proposed design amendments as detailed in GHD's letter of 14 February 2018 (attached) trigger any amendments to the management plans required under the development consent for the approved (Approval 06\_0220) landfill at Waterfall Way Armidale.

Under the development consent a number of management plans are required to be prepared in consultation with the EPA and with other agencies. These plans are also required to be approved by the Secretary of the Department of Planning and Environment (DPE) with the timing of the approval required before either construction works commence or before commencing landfilling at the site. Approval was obtained from DPE for all the plans required to be approved before construction works commenced and these approved plans are listed below:

- AECOM (2017) Water and Leachate Management Plan, dated 15 June 2017
- AECOM (2017) Water Quality Monitoring Plan, dated 15 June 2017
- AECOM (2015) Air Quality Management and Monitoring Plan, dated 23 June 2015
- AECOM (2015) Greenhouse Gas Management Plan, dated 17 June 2015
- AECOM (2015) Noise Management Plan, dated 03 June 2015
- AECOM (2015) Construction Environmental Management Plan, dated 29 September 2015
- AECOM (2015) Construction Quality Assurance Plan, dated 16 November 2016

The proposed design amendments do not alter the spatial location of the interface of the liner systems with the subgrade. As such, there is no need to re-examine the site's approved plans with the exception of the Construction Quality Assurance Plan (CQAP). It is recommended that the attached letter forms part of the Construction Quality Assurance Plan (CQAP) following the EPA's review and DPE's endorsement of the design amendments.

If you have any questions on this advice please contact me on the number listed below.

Sincerely  
GHD Pty Ltd
