Dear Michelle

Thank you for your time reading this email.

I would like to express my full support with the modifications happening in the above mentioned matter. I believe that although I have read of concerns of fire hazards I would like to note that the people in stages 18 and 19 would not physically be moved in for another 36 weeks or so which is when the road will be planned to finalised.

I agree that there should be a required finishing time (March 2020). But this should not impact the people in stages 18 and 19 who some have been paying rent, childcare fees, bills plus on top of this saving for a house that is now in a stalemate.

The people who are objecting this matter are already in their homes and I feel are using stages 18 and 19 as a bribing tool which is simply not fair.

Please don't let these families continue on with this financial burden, let the registration happen prior to the road so these people can finally move on with their lives and houses. These people have already waited 12 months with there already being constant delays to the ready date.

Kind regards
