Subject: Calga Quarry Project Mod 06_0278 MOD 1 objection

To: information@planning.nsw.gov.au, michael.young@planning.nsw.gov.au

Cc: Central Coast Greens - Secretary <centralcoastgreens@gmail.com>

Dear Mr Young

RE Rocla application 06_0278 MOD 1

The Central Coast Greens object to the request by Rocla to extend the deadline for submission of plans and bond from June 30 2014 to June 2016, and instead call for the following requirements for each of the plans in question and the rehabilitation bond:

a) no extension be granted to the lodging of a rehabilitation bond (clause 3/29), because a reasonable estimate can be made based on the current bond, and the bond can be reviewed after the next Environmental Audit (clause 3/30)

b) 3/9 = Noise Management Plan, 3/13 = Air Quality Management Plan, 3/20 = Water Management Plan, 3/28 = Land Management Plan -

while recognizing that the current court cases may impact on future operations - from overturning the approval altogether to slight modifications - some delay in lodging these plans is reasonable, but no more than 3 months from the determination of the Court, since in large part the plans should be prepared.

c) 2/8 = surrender of existing DA - as above, this should not be more than 3 months after the determination of the Court cases

The applicant has been enjoying the benefit of the approval and consent conditions from December 23 2013, while the neighbours and local community would be left in limbo if the extension of nearly 2 years were granted. This is unfair. The applicant should be well advanced in preparing the relevant plans and it is reasonable to expect that the court cases will either halt the extension entirely or only slightly modify it, if at all. Rocla do not need two years to draw up their plans.

yours sincerely

Kate da Costa
on behalf of the Central Coast Greens
