RE. QUEENSLAND HUNTER GAS PIPELINE

Dear Sir.

We are opposed to the GAS PIPELINE coming through our area for the reasons as follows.

- Close proximity to open cut mining.
- Constant blasting big safety issue
- Soil Composition Eroasive, Shallow
- Underlain with Rock.

Major Geological Fault.

Corridor for Flora - Fauna.

Major Gully Flooding.

The Greenlands area that is targetted for the Pipeline is a small acreage subdivision where to the West is open grazing country. Would not be as great a worry as there would be no homes close by.

Regards
Marion Kerley
