#37

Dear Madam,

We would like to lodge an objection to the Hunter Gas Pipeline going through our property north of Narrabri.

We feel that an alternative route should be sought, preferably along the TSR, which would be so much more appropriate and would not be impacting on hundreds probably more farming and grazing properties along the route.

The proposed access through our property "Bobbiwaa" would be right in the middle of a farming paddock, that is always farmed every year. They may be able to take it along a fence line, or along a waterway, but that is not definite at this stage. We feel, there would always be a worry with such a pipeline so close to all the activity that farming generates.

Please take heed of our objection and we would like the Planning Minister to keep us informed of any developments that may take place.

My late husband, was very worried about the proposed route, and now that he has passed away suddenly, we want to pursue the cause for him.

Your faithfully,

FRANCES ANNE LAMPE AND THOMAS MARK HAMILTON LAMPE  
DIRECTORS,  
BOBBIWAA PASTORAL CO. PTY. LTD.
