Mr Glenn Keevers
Macquarie Generation
34 Griffiths Road
LAMBTON NSW 2299

Our ref: S07/00290
Your ref:

Dear Mr Keevers

**Proposed Coal Seam Methane Gas Pipeline, Singleton Local Government Area
(Application Reference: 07_0028)**

I refer to the letter dated 14 November 2007 prepared on your behalf by Parsons Brinckerhoff with which you advise of changes to the proposed pipeline route for the above project and seek to confirm that the project as amended would still be assessed under the existing project application and Director-General's Requirements.

The Department notes that Macquarie Generation has sought to amend the project application by removing the previously proposed north-south component of the project and that this component will be the subject of a separate project application at some time in the future. Further, it is noted that Macquarie Generation intends to retain the east-west component of the project generally unchanged.

On review of the change, the Department is satisfied that the amended project application can be made as a part project application and confirms that the project application has been amended and now relates to only the east-west component of the pipeline. I confirm that the Director-General's Environmental Assessment Requirements, issued 11 April 2007 for the project application, apply to the amended project application and hereby notify you of these environmental assessment requirements for the amended project application.

If you have any enquiries about the above then please do not hesitate to contact Ben Holmes on 9228 6534 or ben.holmes@planning.nsw.gov.au.

Yours sincerely

29.11.07

Chris Wilson
Executive Director
As delegate for the Director General
