Dear Sir

**Re: Use of Effluent on Rehabilitated Mining Land**

We have received today an analysis of the subject effluent water from your plant from Simon Leake (Sydney Environmental & Soil Laboratory). We note that water of this quality would be beneficial if it were used to irrigate our nearby rehabilitated mining land.

We would be pleased to enter into an arrangement with you as we consider that in particular the beneficial properties of nitrogen and lime that the water exhibits would enhance our vegetation.

We believe that we would not need to seek Council approval for the use of the water as it is additional to rehabilitation requirements that we currently have.

We will need to set up a monitoring program to ensure that the water quality always meets the requirements of all Government Agencies.

Yours faithfully

**Reg Crick**  
**MINE MANAGER/SUPERINTENDENT**
