Dear Philip,

**Re: Submission- Wagga Wagga Quarry (07\_0069) Modification 1**

Thank you for opportunity to provide comments with regard to the above-mentioned development.

City Strategy has reviewed the documentation and supports the proposal as it will continue to supply the region with a product to support housing, industry and regional infrastructure.

It is requested that the underlying objective of condition 6(b) be carefully considered. It appears that the restriction was imposed to minimise the impact on dwellings and residentially zoned land that exists along Roach Road and McNickle Road and also the impact on other users of this section of the haulage route. For this reason, Council would expect that any determination have careful regard to:

- The acceptability of any modified dust, noise and vibration impacts on residential receivers along the Roach Road and McNickle Road section of the haulage route.
- The acceptability of any modified traffic impacts of the additional truck movement between 3pm and 5pm with particular regard to the differing road use activities occurring in Roach Road and McNickle Road at these times (e.g. residents travelling home from school and/or work).

Should you have any further questions please do not hesitate to contact myself on 02 6926 9199.

Kind regards,

**Adriaan Stander**  
**Strategic Planning Coordinator**
