Content:
Dear Madam/Sir,

I wish to lodge an objection to Apex Energy's Exploration Project which will cover an area from Sydney to Wollongong. Their licence should not be renewed.

The area includes Sydney's water catchment and some near pristine bushland.

The proposition to have 150 or more coal seam gas wells operating over a 25 year period in a water catchment area without contamination of the water supply would have to rely on a lot of wishful thinking. The experience in the USA and parts of Australia would show wishful thinking cannot overcome adverse outcomes. The adverse outcomes are usually permanent as remediation often causes more harm than the original damage.

To permit coal seam gas mining at all in NSW, given the evidence to date, is irresponsible. To do so in Sydney's water catchment area is criminal.

There is also the destruction of forest and whole eco systems as part and parcel of this plan which should, on those grounds alone, rule it out.

If less gas was exported, there would be no need to coal seam gas mining.

I would firmly recommend the government rethink its entire Strategic Land Use Policy with the aim of providing adequate protection to water, environment and the communities which inhabit these areas.

I declare that I have not donated \$1,000 or more to any political party.
