Submission re CSG Licence Extensions.

Dear Sir/Madam,

I STRONGLY OBJECT to any application for the extension of the licence for Coal Seam Gas mining in our community of Helensburgh, Stanwell Tops, Otford and Darkes Forest, or anywhere that there is a (drinking) Water Catchment.

No CSG operations should be allowed in or near arable lands which are suitable for food production. You cannot eat or drink CSG.

Food and clean water are essential for the sustenance of our State and Country.

Apparently this State Government is considering approvals for CSG and farming to operate in conjunction. This would be an appalling piece of Legislation, if approved.

It is disgraceful that these companies have been permitted to explore and mine in these important (drinking) Water Catchment regions, and their activities should be halted immediately with no permits to continue.

This State Government has the chance to fulfill its promises to voters to limit such activities.

Furthermore, Wollongong City Council has previously exhibited E2 zoned areas around Helensburgh and Stanwell Tops which are now threatened by State Planning, with downgraded zonings to E3, and worse.

These areas are essential for preserving wildlife corridors, especially during bushfire periods and for the prevention of CSG exploration and other inappropriate developments.

In our local area, such E3 zoning impacts on the Hacking River and the Royal National Park, which is National Heritage Listed.

CSG is also a threat to the possible cause of bushfires due to the flammability which may be part of their operation.
