Content:

I wish to object to this modification for the following reasons:

1. A detailed study needs to be undertaken on the amounts and frequency of leakages of methane from exploration and development wells prior to any drilling being undertaken
2. The cumulative effects of drilling, road development, clearing of bush for the required pipework and pumping facilities needs to be fully evaluated in respect of the potential contamination from run-off into water catchments in the Illawarra and elsewhere. This needs to be completed before any Coal Seam Gas Exploration or development is considered.
3. The proposed Coal Seam Gas activities in Illawarra's Water Catchment areas will lead to a substantial increase in bush-fire risk. Bush-fires in the area lead to Water Catchment contamination, as well as potential increased risk to property and life.
4. The proposal is in direct contravention of MR O'Farrell's pre-election promise to prevent Coal Seam Gas activities in the State's Water Catchments.
