Content:

I request that Department of Infrastructure and Planning, and the state government of NSW, reject the application for a 3 year extension to APEX Energy's Coal Seam Gas entitlements. I further request that all applications for CSG exploration and drilling be denied within any and all water catchment areas. I request that no such extension be given until full environmental scrutiny and public consultation takes place. I object to all forms of CSG exploration and extraction due to the risk of damage to the sandstone geology, the increased risk and severity of bushfires, the decrease in the value of properties, the increased risk of water contamination and damage to landscape and wildlife populations.

I also object to Wollongong Council's proposed rezoning (downgrading) of the Royal National Park and surrounding communities from its current high level down to an ordinary Level (E3). It is imperative that the zoning remains as is to protect the community, environment, waterways and wildlife from the impact of CSG exploration and extraction.
