CSG is unacceptable to the community, CSG is unacceptable for generations to come, it is a polluter and is unsuitable for CSG exploration and production and unsuitable for the drinking catchment areas and elsewhere. There is strong public opposition and petition drawing up negative lines against it. and I am strongly opposed to it myself. This is regarded as an unnecessary mining and extraction for gas or forcing something out of the ground which should and is meant to stay in their, drilling and nothing but leaving waste and chemicals behind. The oil and gas in the ground is a must to sustain earth activity and prevent earthquakes, they are like suspension on a motor vehicle. just Figure like the NBN what a waste, no one asked for it, no one needed it, no one wanted it, no one wanted to pay for it, so why did they go ahead do it.

The drinking water catchment is unsuitable and a no go zone for CSG exploration and production. Allowing this development to go ahead contradicts the pre-election promise from Barry O'Farrell: "The next Liberal/National Government will ensure that mining cannot occur... in any water catchment area, and will ensure that mining leases and mining exploration permits reflect that common sense; no ifs, no buts, a guarantee." Lets test and see if a politician can tell the straight truth for once, See if the Government work for the people of this nation or just for themselves and have it backed up with dignity.
