Content:

Having seen the previous NSW Labor government be a servant for the interests of the mining industry in granting CSG exploration permits in water catchments, I took on good faith the promise from Barry O'Farrell that "The next Liberal/National Government will ensure that mining cannot occur... in any water catchment area, and will ensure that mining leases and mining exploration permits reflect that common sense; no ifs, no buts, a guarantee." and voted accordingly. Clearly, this was a cynical lie given the Strategic Regional Land Use Policy released last Tuesday. I now give the O'Farrell government my commitment that I will with `no ifs and no buts' to do all I can to rally opposition to CSG mining in the Illawarra water catchments, until there is a thorough investigation based on scientific evidence that shows that the risks of CSG mining to the water catchments are minimal.
