Address:
50a Dowell Ave

Tamworth, NSW
2340

Content:

I do not support this submission, on the following grounds:

there is insufficient objective research on the long term effects of CSG extraction on our aquifers, which are important for our supply of drinking water and the quality of our arable land, both for farming and for supporting our wildlife.

there is insufficient safeguards in place regarding the safety of the CSG extraction methods.

continuing to deplete a natural resource is not a sustainable solution for our energy requirements
