**Subject: Decommissioning Environmental Management Plan Review**

Dear Ms O'Reilly,

Gullen Range Wind Farm (GRWF) Project Approval (Application No. 07\_0118 MOD 1) Condition 7.7 requires that the approved Decommissioning Environmental Management Plan (DEMP) be reviewed every 3 years after the 30<sup>th</sup> June 2016.

The GRWF DEMP was reviewed on the 27<sup>th</sup> July 2022. No new items that would require an update were identified.

Only very minor items were identified in the 2019 review, which are listed in a cover letter provided with the DEMP. The DEMP and sub-plans will require further updating prior to decommissioning. The sub-plans were not updated at this review. This is consistent with the DEMP which states in Section 1.2.1 the requirement to update the sub-plans prior to decommissioning and Section 1.3 which states that the specific sub-plans will be prepared once decommissioning timing is confirmed.

Kind regards,

Jochen Rasmussen  
Asset Manager
