Subject: Fw: Oberon White Granite Quarry Project (07_0122)

Our concerns regarding the quarry operations:

Environmental: Impacts on the Duckamaloi Water supply if the river is potentially going to be damed for Oberon Water supply.

Flora & Fauna: Trees planted as part of the first Land & Environment Court Ruling was to replace trees that have been removed, none have survived. How much land will be disturbed not just extraction size?

- Significant noise & dust impacts & the visual impact of the extraction pit.
- With the proposed extension, we have great concerns for the safety on our roads and the number of truck movements given the Quarry is proposing to produce up to 250,000 tonnes of extractive materials for the next 30 years.
- What effects the drilling and blasting will have on underground water streams/supplies which feeds our stock as we have an underground bore which adjoins Sue & Hugh Webb
- Decrease land value

Regards
