Attention: Ms Deana Burn

Dear Mr Ritchie,

### **Hunters Hill Remediation Project (08\_0008) Modification 2**

I am writing in response to your invitation of 4 May 2022 to provide comment on Property NSW's request to modify planning conditions within Modification Application Number 08\_0008.

The Environment Protection Authority (EPA) has reviewed *draft* Transportation Management Plan prepared by US-Ecology dated 28 March 2022.

The EPA notes that the modification is for the transfer of the Restricted Solid Waste from Hunters Hill to the ANSTO facility at Lucas Heights for 90 days and for the transport of containers from the ANSTO facility to either Port Kembla (preferred), Port Botany or the Port of Adelaide for shipping to the US Ecology Facility in United States of America.

It is noted that there are no changes in the use of an auditor accredited under the *Contaminated Land Management Act 1997* and that the excavation of the material from the site will be under the supervision of ANSTO.

The material characterisation in the Transportation Management Plan refers to as 'NORM' (section 3). Please note that radiological material that has been processed, such as this material, is no longer considered to be 'Naturally Occurring' in NSW. Please refrain from reference to the material as NORM. Other than this the EPA has no comments on or objections to the modification.

Should you require further information please contact Maria Bowen on (02) 9995 5618 or [maria.bowen@epa.nsw.gov.au](mailto:maria.bowen@epa.nsw.gov.au),

Yours sincerely

5 May 2022

**BEN LIVISSIANIS**  
**Unit Head Regulatory Operations**
