

2.4 Orientation & Views

The site's elevated position provides good views east to the Sydney CBD. North is at approximately 9 degrees west of the alignment of Rookwood Road.

2.5 Access

The Landcom masterplan proposes that two new access roads be provided to the Sydney Water site. Access from the east is proposed off Rookwood Road with the new road also providing access to the Transgrid and NSW Police site. To the south a new access road is proposed off Brunker Road which in addition to providing access to the Sydney Water site will service the Energy Australia site and provide a second means of access to the proposed NSW Police facility.

Sydney Water requires service vehicle access through the site to be maintained to the operational lands to the north of the site.
