Ms Vivienne Goldschmidt
JBA Urban Planning Consultants Pty Ltd
Level 7, 77 Berry St
NORTH SYDNEY NSW 2060

Dear Ms Goldschmidt

**Director-General's Requirements
Warwick Farm Printing Project
Project Application 08_0088**

The Department has received your application for the Warwick Farm Printing Project.

I have attached a copy of the Director-General's requirements for the project. These requirements have been prepared in consultation with the relevant agencies, and are based on the information you have provided to date. I have also attached a copy of the agencies comments for your information.

Please note that the Director-General may alter these requirements at any time.

If your proposal is likely to have a significant impact on matters of National Environmental Significance, it will require an approval under the Commonwealth *Environment Protection Biodiversity Conservation Act 1999* (EPBC Act). This approval is in addition to any approvals required under NSW legislation. It is your responsibility to contact the Department of Environment, Water, Heritage and the Arts in Canberra (6274 1111 or <http://www.environment.gov.au>) to determine if the proposal requires an approval under the EPBC Act. The Commonwealth Government has accredited the NSW environmental assessment process, so if it is determined that an approval is required under the EPBC Act, please contact me immediately as supplementary Director-General's requirements may need to be issued.

I would appreciate it if you would contact the Department at least two weeks before you propose to submit your Environmental Assessment for the project. This will enable the Department to determine the:

- applicable fee (see Division 1A, Part 15 of the Environmental Planning and Assessment Regulation 2000);
- consultation and public exhibition arrangements; and
- number of copies (hard-copy or CD-ROM) of the Environmental Assessment that will be required for exhibition purposes.

Once it receives the Environmental Assessment, the Department will review it in consultation with the relevant agencies to determine if it adequately addresses the Director-General's requirements, and may require you to revise it prior to public exhibition.

The Department is required to make all the relevant information associated with the project publicly available on its website. Consequently, I would appreciate it if you would ensure that all the documents you subsequently submit to the Department are in a suitable format for the web, and arrange for an electronic version of the Environmental Assessment to be hosted on a suitable website during the exhibition period.

If you have any enquiries about these requirements, please contact Megan Webb.

Yours sincerely

2. Mar 2008

Chris Wilson
Executive Director
Major Project Assessment
As delegate for the Director-General

Director-General's Requirements

Section 75F of the *Environmental Planning and Assessment Act 1979*

Application number	08_0088
Project	Development of a printing, warehouse and distribution facility and associated infrastructure.
Location	23 Scrivener St, Warwick Farm, Lot 1 DP 774089
Proponent	Independent Print Media Group Pty Ltd
Date of Issue	7 May 2008
Date of Expiration	7 May 2010
General Requirements	The Environmental Assessment must include: • an executive summary; • a detailed description of the project, including the: – need for the project; – alternatives considered; – engineering and/or architectural plans for the proposed building works; and – various stages of the project; • consideration of the project against any relevant statutory provisions, including whether it is consistent with the objects of the <i>Environmental Planning and Assessment Act 1979</i>; • a general overview of all the environmental impacts of the project, identifying the key issues for further assessment; • a detailed assessment of the key issues specified below, and any other significant issues identified in the general overview of environmental impacts of the project (see above), which includes: – a description of the existing environment; – an assessment of the potential impacts of the project, including any cumulative impacts; – a description of the measures that would be implemented to avoid, minimise, mitigate, offset, manage, and/or monitor the impacts of the project; • a Statement of Commitments, outlining the proposed environmental management, mitigation and monitoring measures for the project; • a conclusion justifying the project, taking into consideration the costs and benefits of the project and the suitability of the site; and • a signed statement from the author of the Environmental Assessment certifying that the information contained in the report is neither false nor misleading.
Key Issues	• Development Controls – demonstrate that the proposal is generally consistent with the Liverpool Council's relevant <i>Development Control Plans</i>, and justify any inconsistencies between the project and these DCPs; • Soil and Water – including: – flooding; – a detailed water balance for the project, outlining the measures that would be implemented to minimise the use of water on site; – wastewater predictions, and the measures that would be implemented to treat, reuse and/or dispose of this water; – the proposed erosion and sediment controls during construction; – the proposed stormwater management system; and – consideration of the potential salinity, contamination and acid sulfate soil impacts of the project; • Noise – including construction, operational and traffic noise;

	• Traffic and Parking – including: – a detailed traffic impact study of the project on the safety and performance of the surrounding road network, and a description of the measures that would be implemented to upgrade and/or maintain this network over time; and – an assessment of the potential parking demand of the project; • Hazards and Risk - including a Preliminary Hazard Analysis (PHA) of the project; • Air Quality – particularly the potential Volatile Organic Compounds (VOCs) and dust emissions; • Odour; • Visual Impacts – including landscaping, the design and articulation of the building, lighting, any signage; impacts on nearby sensitive receivers and any measures to mitigate impacts; • Greenhouse Gas and Energy – calculate the scope 1 and 2 emissions of the project, and describe what measures would be implemented to ensure the operations on site are energy efficient; and • Waste – identify, classify and quantify the likely waste streams that would be generated by the project during construction and operation, and describe what measures would be implemented to minimise, reuse and/or dispose of this waste.
References	The Environmental Assessment should take into account relevant State government technical and policy guidelines. While not exhaustive, guidelines which may be relevant to the project are included in the attached list.
Consultation	During the preparation of the Environmental Assessment, you should consult with the relevant local, State or Commonwealth government authorities, service providers, community groups or affected landowners. In particular you must consult with the: • Department of Water and Energy; • Roads and Traffic Authority; and • Liverpool City Council. The consultation process and the issues raised must be described in the Environmental Assessment.
Deemed refusal period	60 days

State Government Technical and Policy Guidelines - For Reference

Aspect	Policy /Methodology
Soil and Water	
<i>Erosion & Sediment Control</i>	Managing Urban Stormwater: Soils & Construction (Landcom)
<i>Stormwater</i>	Managing Urban Stormwater: Council Handbook. Draft (EPA)
	Managing Urban Stormwater: Treatment Techniques (EPA)
	Managing Urban Stormwater: Source Control. Draft (EPA)
