Re: Integra Underground Project Approval 08_0101 – Water Management Plan

The Water Management Plan for Integra Underground required under Schedule 3. Condition 31 of Project Approval 08_0101 (PA 08_0101) was recently revised.

The plan was revised to include a requirement to analyse water monitoring data annually to assess the effectiveness of the water management system and include groundwater monitoring bore DH316 in the monitoring program. This bore was previously taken out of the monitoring program as it was planned to be mined through.

We are also seeking an exemption from consultation with BCD, EPA, Resources Regulator, Council, and endorsement from DPE Water on the revised plan. This is due to the minor nature of the changes to the plan.

Please don't hesitate to contact me via Scott.Wolfenden@glencore.com.au or 0427213847 if you have any queries on this matter.

Yours sincerely

Scott Wolfenden
