Dear Sam

**Bulli Seam Operations Project (MP 08_0150)
Preferred Project Report**

This letter and its attachments form a Preferred Project Report (PPR) Addendum in respect of the Bulli Seam Operations Project (MP 08_0150) (the Project) in response to the Department of Planning letter (dated 17 September 2010). This PPR Addendum further describes the proposed changes to the Project and the consequential minimisation of its environmental impact.

This PPR Addendum should be read in conjunction with: the Environmental Assessment prepared for the Project; the responses to submissions provided to the then Department of Planning (DoP) and the Planning Assessment Commission (PAC); other supplementary information provided to the DoP and the PAC; the PPR titled *Bulli Seam Operations Project (MP 08_0150) Preferred Project Report* (dated 24 September 2010); and the *Bulli Seam Operations Project (MP 08_0150) Preferred Project Report – Supplementary Information* (dated 19 October 2010). To the extent that this PPR Addendum differs or is inconsistent with the early PPR dated 24 September 2010, or the PPR Supplementary Information dated 19 October 2010, this report prevails over them and modifies them as required by its terms.

PROPOSED CHANGES

The change that BHP Billiton Illawarra Coal proposes to the Project is to exclude all lands within the Dharawal State Conservation Area and Illawarra Escarpment State Conservation Area except the portion of the Dharawal State Conservation Area associated with:

- Longwall 5E1 in West Cliff Area 5;
- first workings of Longwalls 35 to 37 in West Cliff Area 5; and
- the existing operational West Cliff Pit Bottom¹ area which includes the sealed areas associated with continued operations.

¹ The West Cliff Pit Bottom is a node of the underground mine access described in Section 2.5.3 of the Main Report of the Environmental Assessment. The Pit Bottom specifically includes mine services including operational airways and existing ventilation seals for mine safety.

In addition to the above, BHP Billiton Illawarra Coal understands that in accordance with Condition A4 of Project Approval (MP 06-0232) for the Southern Highlands Regional Shooting Complex Hill Top, some 323 hectares of land currently leased by the Illawarra Regional Shooting Association is to be transferred to the control of the *National Parks and Wildlife Act 1974*, consistent with an agreement made on 11 April 2006 with the Department of Environment and Conservation (now Office of Environment and Heritage) and the Department of Lands. These parcels of land currently leased by the Illawarra Regional Shooting Association have also been excluded from the Project.

Attachment 1 shows the proposed revised Project Application Area.

Attachment 2 shows:

- the three lots within the Dharawal State Conservation Area that are associated with Longwall 5E1 and first workings of Longwalls 35 to 37 in West Cliff Area 5 as part of the proposed revised Project;
- the small portion of the Dharawal State Conservation Area that is associated with the sealed area (underground) associated with the existing operational West Cliff Pit Bottom; and
- the land currently leased by the Illawarra Regional Shooting Association.

A list of real property descriptions for the revised Project Application Area is provided in Attachment 3.

CONCLUSION

This change would remove all previously proposed Project activities within the Dharawal State Conservation Area and Illawarra Escarpment State Conservation Area (i.e. longwall mining, associated surface activities, ecological research and monitoring) except for:

- Longwall 5E1 in West Cliff Area 5;
- first workings of Longwalls 35 to 37 in West Cliff Area 5; and
- the existing operational West Cliff Pit Bottom¹ (underground).

The change would also remove all previously proposed Project activities on land currently leased by the Illawarra Regional Shooting Association to be transferred to the control of the *National Parks and Wildlife Act 1974* in accordance with Condition A4 of Project Approval (MP 06-0232) for the Southern Highlands Regional Shooting Complex Hill Top.

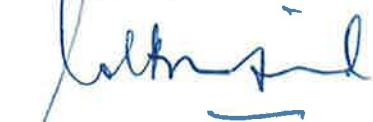

The environmental performance criteria that will now be achieved by the Project include:

- negligible environmental consequences in the Dharawal State Conservation Area; and
- negligible environmental consequences over at least 80% of the Georges River within the Project Area subject to vertical subsidence >20 mm and no impact or environmental consequence greater than minor.

The changes to the Project described in this PPR Addendum result in the minimisation of the environmental impacts of the Project.

The parcels of land associated with the exception areas described above within the State Conservation Area are shown on Attachment 2 (DP752066 Lots 12, 46 and 63; and portion of CADID 104384639 within the Dharawal State Conservation Area). As a result, Landholder Consent from the Minister for the Environment is required prior to Project Approval.

Yours sincerely

Colin Bloomfield

President
