Subject: Bulli Seam Operations (MP08_0150) – Application for Continuation of 24/7 Blasting

Dear Mr McEvoy,

I refer to your letter dated 26 November 2025, requesting the Planning Secretary's approval to continue blasting on a 24-hour, 7 days a week basis for the duration of the Project; outside of the hours specified in condition 4 to Schedule 4A of the consent (MP 08_0150).

I also acknowledge your assessment of air blast overpressure levels from blasting as required by Condition 5 to Schedule 4A of the consent and that this assessment demonstrates compliance with the relevant criteria.

I note your letter dated 26 November 2025:

- is supported by historical real-time blast monitoring which demonstrates compliance with the night-time sleep disturbance maximum noise trigger level criteria specified in Table 2B of condition 2C of Schedule 4 of the consent;
- indicates that no community complaints have been received by the Applicant regarding blasting activities since the last blasting application on 3 July 2025;
- commits to continue to implement relevant mitigation measures including real time blast monitoring, adjustment of blasting schedules to reduce noise levels if necessary and continued consultation with potentially affected neighbouring residents; and
- contains the information required by the conditions of approval.

Accordingly, as nominee of the Planning Secretary, I approve the continuation of blasting associated with the construction of Ventilation Shafts 7 and 8 to be carried out on a 24-hour, 7 days a week basis from the date of this approval until 31 January 2027.

You are reminded that the construction blasting must not exceed the relevant limits outlined in the consent and any non-compliance must be notified to the Department in accordance with the conditions of consent.

If you wish to discuss the matter further, please contact Gabriel Wardenburg on (02) 9585 6810.

Yours sincerely
