---

Dear Andrew,

As mentioned this morning, I can advise that Council has reviewed the proposal to modify the project approval for the Minto Malting and Grain Project and does not object to the project as proposed, subject to there being no change (other than for the addition of 12 silos) to the Limits of Approval provided in the current consent.

Council provides its concurrence on the basis that it is understood that the proposal will not cause an increase in vehicular traffic movement and will not increase the operational output from the site, nor will there be any significant visual impact on the surrounding landscape.

However, and notwithstanding the above, Council requests that the following matters are addressed and reported upon as part of the assessment of the application:

1. The additional noise generated by the conveyor belt systems feeding the proposed silos is to remain under the allowable noise levels stated in the current consent. It is expected that the total noise generated by all activities on the site at any one time are to remain in accordance with the operational noise limits specified in the current consent.
2. The visual impact of the silos and how they will not have a significantly adverse impact on the surrounding landscape.

Council appreciates your patients and apologises for the delay in its response. I trust that this short submission is of reasonable clarity, however if you would like to discuss the contents of the above, please don't hesitate to contact me directly.

Regards

Jim
