Dear Sir

## Royal North Shore Hospital Redevelopment, Helipad – 75W Applications – Statement of Structural Adequacy

Hyder Consulting being the structural engineers responsible for the Royal North Shore – Acute Hospital confirm the following:

The structure as currently designed allows for the additional weight of the helipad. The structure also allows for any additional lateral loadings such as wind loads that will result in the addition of the helipad. We also confirm that additionally, that changes in loading due to the increase in floor to floor height of level 3,4 and 5 have also been incorporated into the current design.

Please feel free to contact me in the office should you have any further queries.

A handwritten signature in black ink, appearing to read "Robert Dales".

Yours faithfully

**Robert Dales**
