- 06_0318 MOD1, to the Concept Plan for Kings Forest (Development Code) (Part3AMod)

I object to the proposed modification.

The now owner of Kings Forest purchased this property with conditions which he agreed to: It amounts to wanton destruction to abridge the conditions. Our wildlife had a safe habitat for twenty thousand years. He should purchase land with a low conservation value and make his development there.

This Forest is priceless. Although the current owner has set fire to the area undermining its conservation value our children's children may never see a Koala on the Tweed. Humans have gone too far. It is such a simple thing to conserve wildlife and even to make the Native Animals into an attraction. The Developer is showing a lack of cooperation with the will of the people who have saved this Kings Forest from degradation in the past.

Yours sincerely
