Kings Forest Residential Subdivision Project Approval Modification

Application No. MP08_0194 MOD 4

I object to this proposal because

Better Koalas Protection is Needed
in King Forest.

The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.

The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).

No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.

The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.

Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting.

The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.

The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

I have made no political donations in the previous 2 years.

Application No. MP08_0194 MOD 4

I object to this proposal because it's important to protect the koalas' habitat

- ☒ The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.
- ☒ The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).
- ☒ No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.
- ☒ The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.
- ☒ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting.
- ☒ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.
- ☒ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

I have made no political donations in the previous 2 years.

I object to this proposal because I have personally seen several koalas in Kings Forest and these will become extinct in Kings Forest if these modifications are allowed. The koala plan is not expensive & is easy to put in place & will enhance the environment & everyone's wellbeing. The need = Environment = koalas.

- ☒ The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.

I object to this proposal because

KEEP KOALA'S IN
THEIR ENVIRONMENT
BUILD + DANGEROUS WHERE

- ☒ The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.
- ☒ The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).
- ☒ No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.
- ☒ The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.
- ☒ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting.
- ☒ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.
- ☒ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

Kings Forest Residential Subdivision Project Approval Modification

Application No. MP08_0194 MOD 4

I object to this proposal because not satisfactory protection for native wildlife - especially the popular national mascot the KOALA

- ☒ The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.
- ☒ The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).
- ☒ No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.
- ☒ The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.
- ☒ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve – this was an important and strategic measure put in place to counter lost habitat – was to be a compensatory koala habitat planting.
- ☒ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.
- ☒ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

I have made no political donations in the previous 2 years.

Kings Forest Residential Subdivision Project Approval Modification

Application No. MP08_0194 MOD 4

I object to this proposal because Community says NO

- ☒ The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.
- ☒ The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).
- ☒ No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.
- ☒ The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.
- ☒ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting.
- ☒ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.
- ☒ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

I have made no political donations in the previous 2 years.

☒ The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.

☒ The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).

☒ No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.

☒ The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.

☒ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting.

☒ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.

☒ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

I have made no political donations in the previous 2 years.

☒ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting.

☒ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.

☒ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

I have made no political donations in the previous 2 years.

I see this as CHANGE BY STATEMENT

I object to this proposal because

we should be ensuring that we protect all our wild animals and there should be NO more development

☐ The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.

☐ The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).

☐ No explanation for refusal to plant Primary Koala food trees which is of little benefit and not adequate for their survival.

☐ The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.

☐ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting.

☐ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.

☐ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

- ☒ The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.
- ☒ The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).
- ☒ No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.
- ☒ The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.
- ☒ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting.
- ☒ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.
- ☒ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

I have made no political donations in the previous 2 years.

I object to this proposal because I am from Tasmania. I have seen what happens when an unexpected problem hits a wild population of animals - you MUST have a VERY VERY healthy population size and resist urban & farming impacts. It is the proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.

☒ The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).

☒ No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.

☒ The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.

☒ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting. *because the border then falls literally to our kids.*

☒ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.

☒ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

I have made no political donations in the previous 2 years. in NSW

Signature 

* Also it really really upsets me that other photo ops of say Landcare using say school kids to replant habitat - that's default child labour!! and UNPAID in a Landcare. Third world countries at least pay the kids.

I object to this proposal because

the developer wants to fence an area adjacent to this WROCK. The future needs to be considered. Short term gain is not the answer.

The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.

The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).

No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.

The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.

Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve - this was an important and strategic measure put in place to counter lost habitat - was to be a compensatory koala habitat planting.

Don't destroy Koala habitat

☒ The proposed modifications to this Development reverse the very strict conditions that gave the Development its approval in the first place both through the State and Federal governments.

☐ The developer does not want to put in place environmental management plans (crucial) prior to commencement of heavy duty earthworks in an environmental protection zone (sensitive land).

☒ No explanation for refusal to plant Primary Koala food trees vital for Koala's existence and semi replace with Secondary Koala food trees which is of little benefit and not adequate for their survival.

☒ The modification shows a reduction to the Southern end of the East West Corridor from the minimum of 100m down to 50m wide and does not link to the Environ Rd corridor therefore it will be ineffective for its purpose for Koala movement.

☒ Total refusal to plant the 27 hectares of Koala Habitat in Cudgen Nature Reserve – this was an important and strategic measure put in place to counter lost habitat – was to be a compensatory koala habitat planting.

☒ The modification shows connection roads without any fencing whatsoever and offers no valid explanation for placing Koalas in direct contact with vehicle strike on busy roads and with people and their pets on foot.

☒ The Developer wishes to delete the use of calming devices during preliminary works (heavy machinery) which is the extra precaution required through this crucial time.

I have made no political donations in the previous 2 years.
