NSW Planning & Environment
GPO Box 39
Sydney NSW 2001

Dear Mr Dumbleton

Sect 75W Modification of PA08_0212 (New Berrima Clay/Shale Quarry)

I refer to your e-mail dated 6 May 2015 regarding a modification application to an existing consent for New Berrima Clay/Shale Quarry. Thank you for an opportunity to review the environmental assessment for the modification application and requesting any comments on the proposed modification.

WaterNSW has reviewed the Environmental Assessment and notes that the modification seeks to relocate and expand the approved quarry extraction area, revise infrastructure location and modify the quarry final landform.

WaterNSW considers that the proposed surface water management measures are likely to achieve neutral or beneficial effect on water quality provided these controls are implemented during construction and operational stages of the project.

WaterNSW notes that existing consent includes Condition 18 for the preparation of Water Management Plan incorporating a Site Water Balance, Surface Water Management Plan, Groundwater Management Plan and Erosion and Sediment Controls in consultation with EPA, SCA and NOW. Please note WaterNSW was established on the 1 January 2015 bringing together the former Sydney Catchment Authority and State Water. Please replace "SCA" with "Water NSW" in the modified consent including Condition 18.

WaterNSW would appreciate being involved in any future assessment of the application.

If you have any comments with regards to this letter please contact Neil Cowley on 48869417.

Yours sincerely

MALCOLM HUGHES
Senior Manager, Planning and Environment
