Architectural floor plan of a building. The plan features a curved roof structure and a rectangular plant room on the right side. The plan is overlaid with a grid system. Vertical grid lines are numbered 1 through 9 from left to right. Horizontal grid lines are lettered A through D from top to bottom. Dimensions are indicated for various segments: horizontal segments between grid lines 1-2, 2-3, 3-4, 4-5, 5-6, 6-7, 7-8, and 8-9 are all 8100. Vertical segments are dimensioned as follows: 4500 between A and B, 7500 between B and C, 7500 between C and D, and 2250 below D. The plant room is located between grid lines 7 and 8, and between horizontal lines C and D. It contains three rectangular units. The roof area is labeled 'ROOF'. The building's footprint is defined by a curved outer boundary and a straight inner boundary. A dashed line connects grid line 1 to the roof edge, and another dashed line connects grid line 3 to the roof edge. The plant room is connected to the main building structure by a series of lines.

Diagram illustrating the proposed station layout, showing the station building, tracks, and surrounding infrastructure. Key features include:

- Station Building: A gabled structure with an "OFFICE" and a "MACHINERY PIT" below it.
- Tracks: Three tracks are shown to the left of the station building, with level markers: RL +15.25, RL +10.00, and RL +4.50.
- Gabion Wall: A wall separating the tracks from the station building.
- Access Road: A road labeled "ACCESS RD" leading to the station building.
- Boundary: A line labeled "BOUNDARY" on the right side of the diagram.
- Vegetation: Trees and shrubs are shown along the boundary and near the tracks.
