Subject: Application n. MP09_0068

Regarding: Application of the former Rachel Forster Hospital Site:
134-144 Pitt St Redfern (Application n. MP09_0068)

I strongly object to the application for the development of the former Rachel Forster Hospital.

I strongly believe there is no benefit towards our local community with this project. The structure in question implies a strong negative impact on our community and its way of life.

I would like you to consider yourself in our shoes. How would you respond?

There is no need to build up. Keep our heritage, our landscape, our existing way of life. Do not bring the city to us. Give us a chance to come to an agreement on a project that will suit our community.

Population increase. This will be an issue on an already heavy congested area. There are no roads to beat traffic congestion here. If this plan goes ahead the flux of people in and out of this area will be too much. The city routes through Regent, Lee, Cleveland and Chalmers streets are already congested. A building of this structure has not been thought out well. its impact on the community is much more than what's been addressed.

It's a shame that no one is listening to the people here.

The older generation has not been heard. Many do not comprehend what's happening at their doorstep. Let's consider those people.

We locals entrust in you the recognition to give us a real chance to come to an agreement on this matter.

Kind Regards,

Cybele Lemos
101 Pitt St, Redfern
