RE. ORCHARD HILLS WASTE & RESOURCE MANAGEMENT FACILITY

The ongoing community consultation process has constructively shaped the proposed Orchard Hills Waste & Resource Management Facility.

We're listening to community's concerns and putting in place solutions that provide confidence in the project's integrity and ensure environmental safeguards for residents are the highest priority.

Throughout consultation the community has said:

"We're concerned about air, noise and visual pollution".

In response, Dellara have announced the Orchard Hills Waste & Resource Management Facility will include:

1. The latest air and noise monitoring technology to ensure that the facility operates within the strict environmental guidelines and regulations set by the authorities; and
2. Investing in additional landscaping along the northern boundary to provide greater visual amenity to the site as well as further ameliorating noise.

Our commitment

Orchard Hills Waste & Resource Management Facility has been designed to the highest planning and environmental standards. There will be no hazardous, chemical, toxic or domestic waste recycled or deposited onsite and we're investing in the latest air and noise monitoring equipment to ensure the site operates to the strict guidelines set by the authorities.

Enclosed is a copy of the latest project update, which provides further detail on the Orchard Hills Waste & Resource Management Facility and clarifies some of the misconceptions.

We want to hear from you. If you have any queries or comments, please don't hesitate to contact us on (02) 9299-5400 or rodericksyd@ozemail.com.au.

Yours sincerely,

Rick Miller
