Additional Construction Jobs	0

Modification Description

Increase the hourly limit from 5 laden trucks per hour to 10, and the daily limit from 50 to 100 trucks per day. The Proponent does not propose any change to the annual extraction limit. The application is being sort for intermittent periods of high demand to enable the Quarry to supply material to large projects including the Pacific Highway upgrade. The frequency of 10 trucks per hour traveling on any one route will be rare.

How is the modification substantially the same as the original development?

It is important to note that the proposed increase to truck movements would only be for intermittent periods as the overall yearly trucks movements will not increase. The Proponent does not propose any change to the annual extraction limit and hence the overall yearly trucks movements will not increase.
