Subject: Nepean Hospital redevelopment

Hi Margot

Received your letter of 16 July today.

I assume you received my name from the advice I provided to Steensen Varming last year.

I also assume you have a copy of this advice.

It indicated, in simplest terms, that the electricity supply system providing the main supply to the Nepean Hospital is somewhat limited in terms of additional supply capacity, and the backup supply system is only capable of providing alternate supply for existing load after considerable switching within the Integral network to move local load to free up feeder capacity for backup to the main feeder for a limited period.

I don't know what additional load the next stage of development, to which you refer in your letter, will require, but there are limitations with our existing network.

Depending on your needs, there may be a requirement to engage Accredited Service Providers to provide network augmentation at the expense of Health.

If you have not seen the advice I provided last year, please contact me and I will send you a copy.

As soon as possible, an 'Application for the Connection of Load' should be provided on behalf of the Nepean Hospital so we can assess the effect on our network and advise what work is required to be performed to enable Integral to supply the increased load.

Regards

Brian
