Project Info

Project Name	MOD 4 - Increased RSF Capacity
Additional Capital Investment Value(excl GST)	AUD5,750,000.00
Additional Operation Jobs	0
Additional Construction Jobs	15

Modification Description

The Proposed Modification seeks consent for the following.

- Construction of Stages 7 to 9 of the Residue Storage Facility, comprising an additional 2.36Mt of capacity and an increase in height of 6m.
- Importation of waste rock and a bulk sample from proposed underground exploration to the south of the Mine Site and use of the Mine Site and associated infrastructure to support underground exploration operations south of the Mine Site.

No other changes to the approved Mine are proposed.

How is the modification substantially the same as the original development?

- The modified RSF would be only 6m higher and approximately 5ha larger than the approved RSF.
- Importation of 335,000t or 161,250m3 of waste rock and 20,000t of bulk sample would be insignificant when compared to the volume of waste rock and ore already mined.
- All other aspects of the Mine would remain as approved
